

# Inventory SOP: Download a Stranded Inventory Report

03/17/2025 8:21 am CDT

**Who is this for?** This is for all individuals and sellers who want to know how to download a Stranded Inventory Report.

**Objective:** This Standard Operating Procedure (SOP) will help you understand how you can download a Stranded Inventory Report. The stranded inventory report shows a breakdown of units in your inventory that are in stranded status.

1. Go to the "Reports" tab on the top menu and select "Fulfillment" from the drop-down menu.

The screenshot shows the Amazon Seller Central interface. On the left, a navigation menu is open, with the "Reports" tab highlighted by a red box. A red arrow points to the "Fulfillment" option within the Reports dropdown. The main content area shows a table of inventory items with columns for Date Created, Status Changed Date, Available, Inbound, Unfulfillable, Reserved, Estimated fee per unit sold, Price and shipping cost, and Sales Rank. The table contains several rows of data, including one row with a quantity of 10 units.

2. Click the "Stranded Inventory" link under the "Inventory" header on the left-hand side of the page.

- Stranded Inventory**
- Show more...

**Overview**

This information pertains to FBA Sellers only.

Welcome to the Fulfillment Reports page. All fulfillment reports can be found in the left-hand column. Reports are split up into Inventory, Sales, Payments, Customer Concessions, and Removals. Read below for informative tips and help on getting the most out of your reports.

You can download reports as comma-separated values (.csv) or in text (.txt) format. Using .csv format will let you open reports in a spreadsheet. However, the leading zeros from MSKUs, ASINs, and FNSKUs will be dropped. If you require the leading zeros, you can download the file in .txt format. For more information on how to import a .txt file, review the help content for the spreadsheet application that you use.

For help with issues not addressed in the fulfillment reports, contact [Seller Support](#)
