

Catalog SOP: Download a Small and Light Inventory Report

03/03/2025 11:36 am CST

Who is this for? All individuals who need to create a small and light inventory report.

Objective: To provide sellers with detailed information about the inventory they have stored in Amazon's fulfillment centers that qualifies as "small and lightweight."

1. To generate a Small & Light Inventory Report, go to the Menu icon on the upper-left of Seller Central and select Reports then Fulfillment.

The screenshot displays the Amazon Seller Central interface. On the left, a 'Menu' dropdown is open, listing various categories. The 'Reports' category is highlighted with a red box. A secondary dropdown menu is visible, showing options like 'Payments', 'Amazon Selling Coach', 'Business Reports', 'Fulfillment', 'Advertising Reports', 'Return Reports', 'Custom Reports', 'Inventory Reports', and 'Tax Document Library'. The 'Fulfillment' option is also highlighted with a red box. The background shows the 'Reports' page with an 'Overview' section and a 'Most Popular Reports' list containing: 1. All Orders, 2. Inventory Ledger, 3. Manage FBA Inventory, and 4. FBA customer returns.

2. Under the "Inventory" header on the left side of the page, click on Show More, then the Small & Light Inventory link.

Overview

This information pertains to FBA Sellers only.

Welcome to the Fulfillment Reports page. All fulfillment reports can be found in the left-hand column. Reports are split up into Inventory, Sales, Payments, Customer Concessions, and Removals. Read below for informative tips and help on getting the most out of your reports.

You can download reports as comma-separated values (.csv) or in text (.txt) format. Using .csv format will let you open reports in a spreadsheet. However, the leading zeros from MSKUs, ASINs, and FNSKUs will be dropped. If you require the leading zeros, you can download the file in .txt format. For more information on how to import a .txt file, review the help content for the spreadsheet application that you use.

For help with issues not addressed in the fulfillment reports, contact [Seller Support](#)

What's New

Six reports have been discontinued: Daily Inventory History, Monthly Inventory History, Inventory Event Detail, Inventory Adjustments, Inventory Reconciliation, and Received Inventory. These reports have been consolidated and replaced with the Inventory Ledger report.

Replenishing inventory

Making a decision about replenishing inventory requires three primary data points: sales velocity (average weekly sales), on-hand inventory (fulfillable quantity), and inbound quantity. These three data points are used to calculate your inventory coverage before you run out, commonly known as weeks of cover (WOC), and calculated as on-hand inventory plus inbound quantity divided by average weekly sales.

Suggested reports:

[FBA Inventory](#) (contains the three data points and weeks of cover), [Manage FBA Inventory](#), and [Amazon Fulfilled Shipments](#)

Best practices:

- Try to keep your weeks of cover between 2 (or the number of weeks it takes you to replenish) and 13 (inventory for a quarter), except when stocking

3. On the next page, you can download the report in Excel format by clicking on the Request .csv Download button.
