

Manage Skustack Devices

04/09/2025 12:47 pm CDT

Overview

In this article, you will learn how to seamlessly register and manage your [Skustack](#) devices. Simply open the Skustack app on your device and you will be prompted to register upon login. Once registered, all devices linked to your account will sync with your server in real time, ensuring that everyone is using the most up-to-date information. The Skustack app can be [installed](#) on multiple devices, allowing several team members to work on inventory management simultaneously, while the Skustack Admin portal enables you to manage all registered devices and their settings all from a single platform.

Register a New Device

To register a new Skustack device:

1. [Log into](#) the Skustack app.
2. Enter your team name and login credentials.
3. Tap the **Register** button. Alternatively, you can go to **Settings > DeviceID**, and tap on the ID to manually trigger the prompt.
4. Upon successful registration, a message will appear to confirm that the action was completed.

If your device is not registered, you will be able to log into Skustack, but you will not have access to any of the application's functionalities.

Manage Devices

Control the functionalities that can be accessed and performed by specific users and ensure that each user has the appropriate settings to carry out their designated functions within the warehouse.

Search Skustack Devices

To search for registered devices:

1. Navigate to the Skustack Admin portal at <https://xx.skustack.com> (replace "xx" with your **server ID** or **team name**).
2. Enter your login credentials.
3. On the left, select **Settings > Devices > Manage Devices**.
4. Configure your **Default filters** to make sure that the results display exactly what you need.
5. Click **Search**. Each filter you apply gets highlighted. If a filter is gray or not displayed at all, it's not active.
6. To manage the columns in the grid, click the three dots icon on the top right and select **Customize Columns**. You can:
 - a. Reorder columns by dragging them up or down in the list;
 - b. Hide columns by clicking the **Trash** icons;

c. Add columns by clicking **Add column**.

7. To arrange the data in a different order, use the **Sort by** menu.

8. To save your filtering and sorting options, click **Save view**, enter a **Name**, and click **Save**.

The screenshot displays the Skustack web application interface. On the left is a dark sidebar with a 'Settings' section containing 'Manage Devices', which is highlighted with a purple box and a purple arrow. The main content area is titled 'MANAGE SKUSTACK USER LOGIN' and features a search bar, filter buttons for 'Nickname', 'User', 'Device', 'Status', 'Include Inactive', and 'Include Deleted Devices', and a 'SAVE VIEW' button. Below these is a table with the following data:

<input type="checkbox"/>	NICKNAME	USER	DEVICE ID	STATUS	FIRST NAME	LAST NAME	
<input type="checkbox"/>	nickNameTest2	nickName@sellercloud.com	91234567890123456789	Online	nickName	nickName	History

9. Select your desired user in the grid and access the **Actions** menu to either **Update Nickname** or **Logout Device**, or click on the **User** to be directed to the **Employee Details** page.

Skustack devices can also be remotely disconnected by [Sellercloud Support](#) from the Real-Time Connect (RTC) Server. When contacting support, be prepared to provide the unique device ID or the respective username.

Manage Device Settings

To prevent users from modifying [Warehouse Management settings](#) on their device, enable the client setting **Skustack Security PIN Enabled**. This setting ensures that only authorized users can make changes, adding an additional layer of security and control. A 4-digit value must be entered in the **Skustack Security PIN** sub-setting field.

To manage device settings, follow the steps below:

1. On the **Employee Properties** page, go to **Toolbox > Device Settings**.

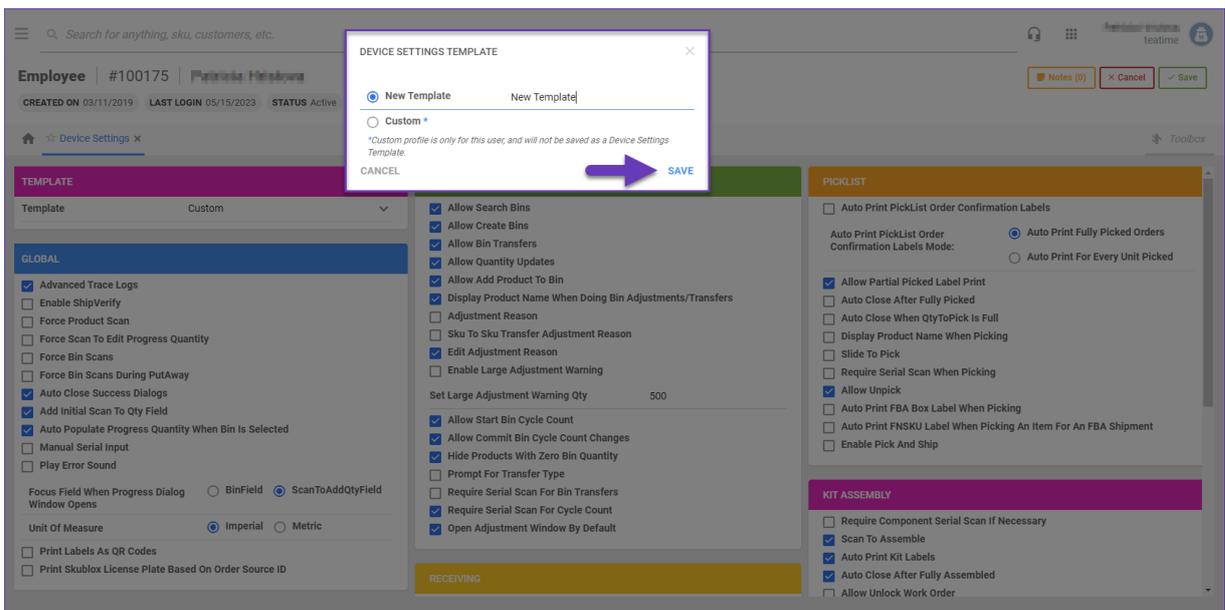

2. Click **Edit** to make the necessary adjustments.

3. **Save.**

a. as a **Custom profile** – saves the settings as a unique profile specific to this user.

b. as a **New Template** – saves the profile as a **Device Settings Template** which can be assigned to multiple users.

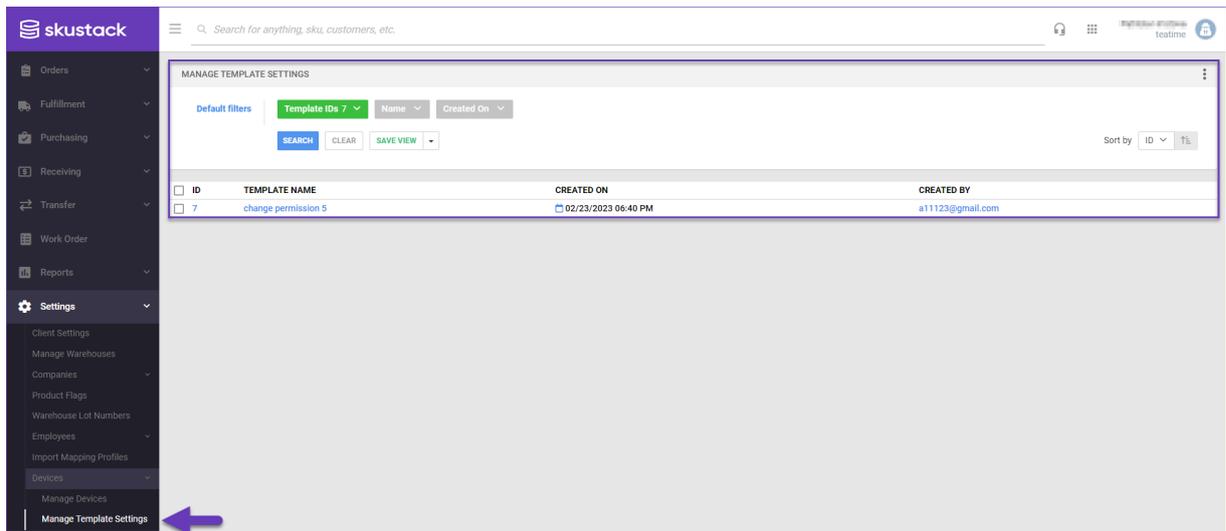

By configuring templates, you can define a complete set of settings that can be easily applied to any Skustack user, allowing you to automate data population, and enhance overall efficiency.

Manage Template Settings

Templates are typically created when saving an employee's device settings. Once created and assigned, templates can be viewed, deleted, and managed from the **Template Settings** page. To do that:

1. Navigate to **Settings > Devices > Manage Template Settings**.

2. Select your desired template(s) in the grid and:

- a. access the **Actions** menu to **Delete Template(s)** or
- b. click on the **Template** to manage it

3. If you have chosen option “b”, you will be directed to the **Device Settings Template** page.

4. Click **Edit** to make adjustments as needed.

5. **Save**.
