Language Settings

Overview

The **Language** settings enable you to easily switch between several options, depending on your preferred language. This functionality can significantly enhance the overall usability of your Skustack devices, as it gives access to a more diverse workforce and ensures that language differences do not hinder your warehouse operations. Each device can be configured separately, allowing you to select a different language based on the preferences of the worker using it.

Change Language

To change the device's **Language**:

1. Navigate to the **Main Settings** menu and locate **Settings**.

2. Tap on **Language** and select the preferred language option:

   a. **English**

   b. **Spanish**

   c. **French**

   d. **German**

   e. **Italian**

3. Your Skustack will update its interface to reflect the chosen language.
