

Manage Warehouses

04/09/2025 12:47 pm CDT

Overview

Create multiple warehouses within the Skustack Admin and configure them according to their intended use. Mark your warehouse as **Sellable** to make the inventory available for sale, or as **Unsellable** to exclude those quantities from the product's available inventory.

Warehouse Types

Refer to the table below for a definition of each warehouse type:

TYPE	DESCRIPTION
Normal Warehouse	The most common type of warehouse. Refers to a typical in-house facility where your inventory is stored.
Cdiscount Warehouse	Associated with products that are stored at a Cdiscount Fulfillment Center.
DropShip Warehouse	This is typically used for vendor feeds. Inventory in the dropship warehouse will not be included in average cost calculations.
FBA Warehouse	Associated with products that are stored at an Amazon Fulfillment Center. Also used for FBA Shipments.
Interim Warehouse	Represents inventory that is in transit between two warehouses (i.e., between a Normal warehouse and an FBA Warehouse). This means that when you're shipping a product from your Normal warehouse to an FBA center, your shipment will be tracked by placing it in an Interim warehouse. When Amazon receives the shipment, the inventory will automatically transfer into the FBA warehouse. It is possible to create multiple Interim warehouses, which can be designated for different purposes. For example, you can create different interim warehouses such as "In transit to FBA" and "Company Truck".
Untested Warehouse	Inventory in this warehouse will not be included in backorder calculations. This warehouse will not be available under Warehouse Inventory Transfers requests when choosing from and to warehouses.
NewEgg Warehouse	Associated with products that are stored at a NewEgg Fulfillment Center.
WFS	This is associated with products stored in WFS warehouses. Also used for WFS Shipments.

Sellable and Unsellable Warehouses

- Warehouse marked as **Sellable** – All inventory in that warehouse may be sold, provided that the individual products' selling criteria are met.
- Warehouse marked as **Unsellable** – All inventory in that warehouse will not be included in the product's available inventory. However, its inventory will be included in the product's total physical inventory count.

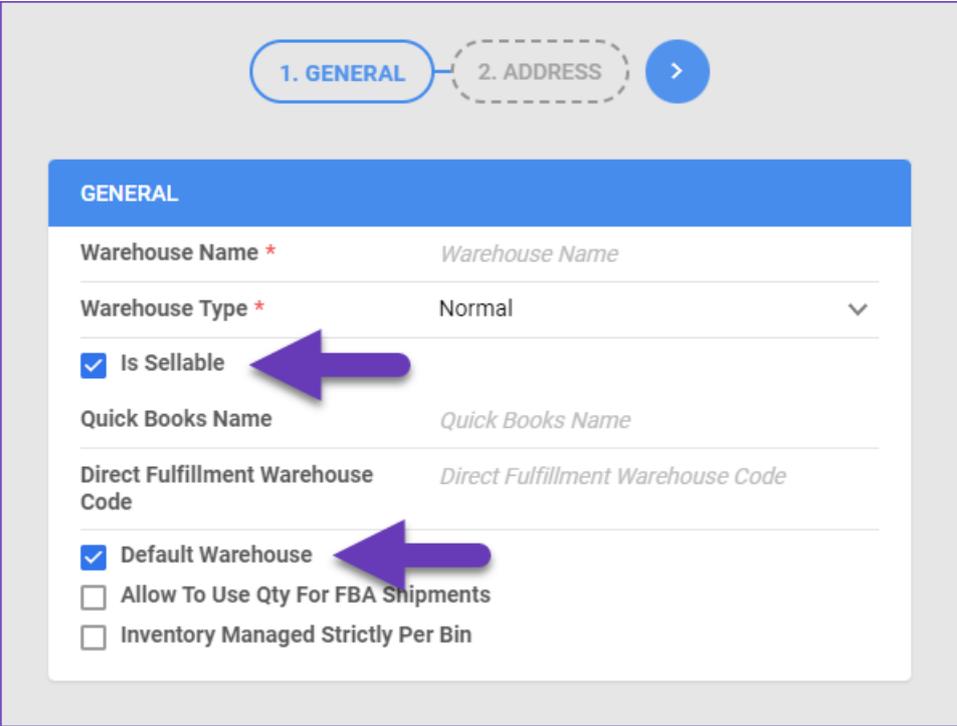

By default, orders will reserve inventory from the default warehouse. However, if the default warehouse is **Unsellable**, the reserve will not be included in the available inventory calculation and this can potentially lead to overselling.

You can create FBA/WFS inbound shipments using inventory in a given warehouse only if the option **Allow to use qty for FBA/WFS Shipments** is enabled on the Warehouse Details page of that warehouse. By default, the option is disabled.

Create a Warehouse

You can create a new warehouse from the **Manage Warehouses** page.

1. Go to **Settings > Manage Warehouses**.
2. Access the **Actions** menu > **Add warehouse**.
3. Fill out the Warehouse Name, Type, and Sellable status. Check the **Default Warehouse** box to configure this location as your default warehouse.

The screenshot shows a form titled '1. GENERAL' with a '2. ADDRESS' tab. The 'GENERAL' tab is active. The form contains the following fields and options:

- Warehouse Name *** (text input field)
- Warehouse Type *** (dropdown menu, currently set to 'Normal')
- Is Sellable** (checkbox, highlighted with a purple arrow)
- Quick Books Name** (text input field)
- Direct Fulfillment Warehouse Code** (text input field)
- Default Warehouse** (checkbox, highlighted with a purple arrow)
- Allow To Use Qty For FBA Shipments** (checkbox)
- Inventory Managed Strictly Per Bin** (checkbox)

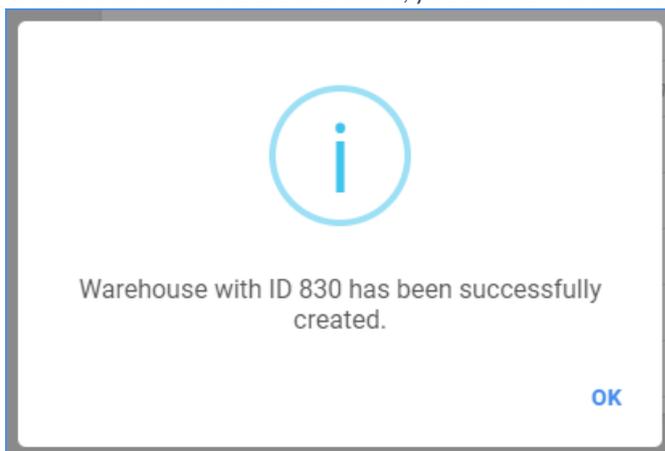

To manage inventory strictly per bin, follow the instructions outlined [here](#).

4. Fill in your address and click the green flag icon to finalize the process.

The screenshot shows a form with two tabs: '1. GENERAL' and '2. ADDRESS'. The '2. ADDRESS' tab is active. The form fields are as follows:

ADDRESS	
Saved Addresses	Select
Business	Sellercloud
Name	<i>First and last names</i>
Country	United States
Address	410 Monmouth Ave
ZIP Code	08701
City	Lakewood
State	NJ

5. Once the new warehouse is created, you can view and edit its details from the **Manage Warehouses** page.

Deleting a warehouse should **NOT** be done without the assistance of a Sellercloud representative. Contact [Sellercloud Support](#) or your onboarding representative if you ever need to do this.
