FBAInbound BoxContent Module
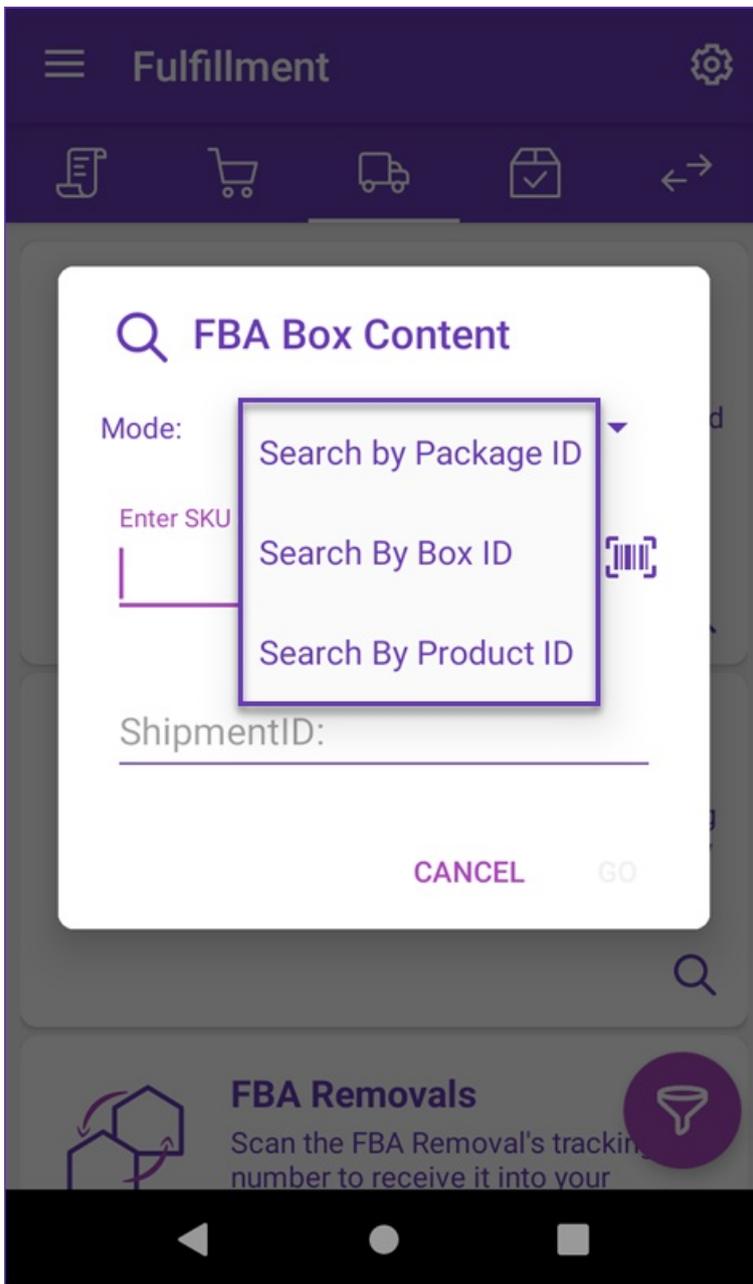

04/09/2025 12:48 pm CDT

Overview

The **FBAInbound BoxContent** module is located within Skustack's **Fulfillment** tab. This module allows you to seamlessly view and edit boxes for your FBA Shipments by scanning their package or box ID.

You can search for boxes in one of three ways:

1. **Search By Package ID** – Search by the Amazon Package ID.

2. **Search By Box ID** – Search by the Sellercloud Box ID.

3. **Search By Product ID** – You can filter by:
   SKU or UPC
   Filters by a specific product or UPC.

   ShipmentID
   Filters by a specific Amazon Shipment ID.

Manage Box Content

To manage box content and assign products to each box:

1. Navigate to the **Fulfillment** tab.

2. Select **FBAInbound BoxContent** module > **Search.**

3. Tap **Mode** > Choose your desired mode.

Based on Amazon's Shipping and routing requirements, boxes containing multiple items should not exceed 50 pounds. A warning message during the boxing process will indicate if the weight of the boxed items exceeds this limit. The verification will only occur if valid product weight information has been entered.
You can also manage boxes from the **FBA Inbound PickList** module. Learn more about that here.

Search by Package ID

1. Scan/Enter the Amazon Package ID > **Go.**

2. The system will load all boxes for this shipment.

3. Swipe left to reveal shortcuts to other actions:

    a. **Dimens** – Set box dimensions, enter a tracking number, or get a 4D scale reading.

    b. **Delete** – Delete the box.

    c. **Duplicate** – Duplicate the box.

4. Swipe down and tap the **+** icon to add more boxes to this shipment or swipe left on an existing box to duplicate it.

5. Tap the **Box#** you want to add items to.

6. Scan units to add qty to boxes or adjust the number manually.

Search by Box ID

1. Scan/Enter the Sellercloud Box ID > **Go.**

2. The box will load.

3. Scan units to add qty to boxes or adjust the number manually.

4. Swipe left on an item to reveal shortcuts to other actions:

    a. **Info** – Open the product info module.

    b. **ExpiryDate** – Set expiration dates as well as view existing ones. Learn more about expiration dates and lot numbers here.

    c. **Labels** – Print FBA product labels for each item.

5. Tap the **Dimensions** icon to set dimensions.

6. Tap the **Print** icon to print an Amazon 2D Barcode, Skustack Box ID, or Amazon Box Label.

View Box IDs

The Skustack Admin portal lets you view your shipping box IDs by simply opening the FBA shipment.

1. Navigate to the Skustack Admin portal at **https://xx.skustack.com** (replace "**xx**" with your **server ID** or **team name**).

2. Enter your login credentials.

3. On the left, select **Fulfillment** > **Manage FBA.**

4. Select the shipment.

5. In the **Amazon Shipments** panel, click on the **Shipment ID** or go to **Toolbox > Amazon Shipments.**
