

Access Sellercloud

06/03/2025 4:31 pm CDT

Overview

The Delta User Interface in Sellercloud offers a modern and user-friendly platform for e-commerce management. It simplifies tasks like inventory management, order processing, and sales channel management, making it easier for sellers to navigate and optimize their online operations. This article will walk you through the different ways to access Delta if you are using our Legacy Interface.

We have also introduced [User Notifications](#), only available in Delta, to help you keep track of important events of your operation.

[Two-factor authentication](#) is required to log into Sellercloud's platform.

If you encounter an issue in Delta UI, you can report it by [following these directions](#).

Log into Delta

Unless you are a **Client Admin**, your Alpha [user permissions](#) will not automatically transfer to Delta. Your Sellercloud **Client Admin** must assign a security template before you can log into Delta for the first time. These permissions can later be edited.

Once your access rights are granted, there are 3 ways to log into Delta:

- Via your direct [Server URL](#)
- Via the [Delta login page](#)
- Via the [App Switcher](#)

Direct Server URL

The URL to access Sellercloud's Delta interface is similar to Alpha but includes text **delta**, instead of **CWA**:

- **Delta URL** – Server ID.*delta*.sellercloud.com (for example, xx.delta.sellercloud.com).
- **Alpha URL** – Server ID.*cwa*.sellercloud.com (for example, xx.cwa.sellercloud.com).

If you choose to use your direct server URL, there will be no prompt to populate a team name – simply enter your **Email** and **Password** and click **Login**. Check the **Remember Me** box to save your credentials on trusted devices.

In case you don't remember your credentials, use the **Forgot password?** link.

Delta Login Page

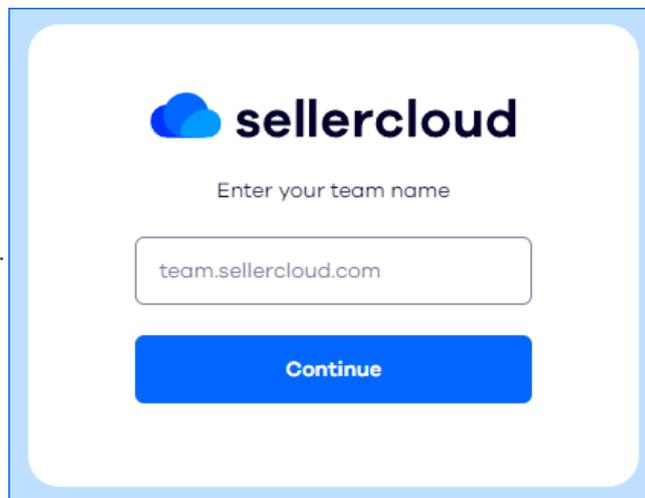

Another option to log in is to use the [Delta login page](#). There, you should populate a team name to direct you to the correct server.

If you don't know your team's name, or if your company doesn't have a team name yet, contact [Sellercloud Support](#).

To access Delta:

1. Open <https://login.sellercloud.com/>.

2. Enter your **team name** and click **Continue**.

3. Populate your username and password, and click **Continue**. If you are an existing Sellercloud user, use your existing team name.

App Switcher

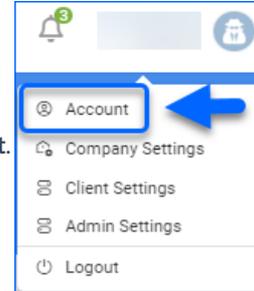

You can also easily transition from the Alpha UI and different Sellercloud applications to the Delta Interface simply by clicking the App Switcher button located at the top right corner of your screen.

Generate QR Code

The **Generate QR code** feature allows you to conveniently generate and print 2D login barcodes for yourself or any other users of the application, making it easier to handle tasks related to user authentication and access control.

To generate a QR code:

1. Click on your account's name in the upper right-hand corner and select **Account**.

2. Navigate to the **General** panel.
3. Click **Generate Login QR Code**.

A screenshot of the 'GENERAL' settings panel. At the top, it says 'GENERAL' and 'We will use the information provided below to contact you with any account related communications.' Below this are three input fields labeled 'First Name', 'Last Name', and 'Email'. At the bottom right, there is a blue button with a QR code icon and the text 'Generate Login QR Code'.

4. Choose whether you want to generate the code for yourself or someone else.
5. Enter the required email address and password fields.
6. Click **Generate QR**.

A screenshot of the 'GENERATE LOGIN QR CODE' dialog box. It has two radio buttons: 'FOR MYSELF' and 'FOR SOMEONE ELSE'. Below them is a message: 'Your team is teatime'. There are two input fields labeled 'Mail *' and 'Password *'. At the bottom left is a 'CANCEL' button and at the bottom right is a 'GENERATE QR' button.

You can use the generated QR code for easy access to all Sellercloud mobile applications.
