

# Download and Install Shipbridge

04/30/2025 3:10 pm CDT

## Overview

Shipbridge is a desktop application that lets you import orders from your connected sales channels into a single interface where they can be fulfilled. This article is a step-by-step guide on downloading and installing Shipbridge on your computer.

If you already have the application installed and need to update your current version, check out our [Update Shipbridge](#) article.

## Prerequisites

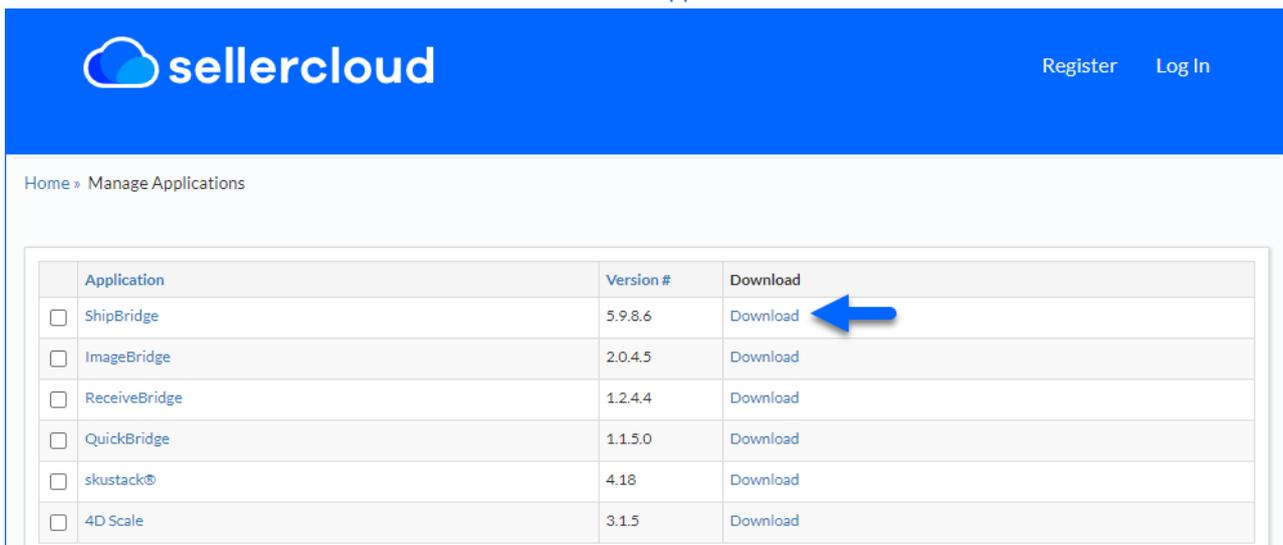

Before installing Shipbridge, make sure you meet the following requirements:

- **Operating System** – Windows 7 or later
- **RAM** – 2 GB
- **Hard Disk Space** – 159 MB
- **CPU** – Dual-core 2GHz

Shipbridge is **Windows**-based, however, certain programs allow you to run Windows software on a Mac operating system, such as the **Windows emulator for Mac**. Alternative workflows are often discussed by our existing clients in the [Sellercloud Forum](#) (login required).

## Download Shipbridge

You can download the latest version from the [Sellercloud Support Portal](#).

The screenshot shows the Sellercloud Support Portal interface. At the top, there is a blue header with the Sellercloud logo and 'Register' and 'Log In' links. Below the header, the breadcrumb 'Home » Manage Applications' is visible. The main content area contains a table with the following data:

Application	Version #	Download
<input type="checkbox"/> ShipBridge	5.9.8.6	<a href="#">Download</a>
<input type="checkbox"/> ImageBridge	2.0.4.5	<a href="#">Download</a>
<input type="checkbox"/> ReceiveBridge	1.2.4.4	<a href="#">Download</a>
<input type="checkbox"/> QuickBridge	1.1.5.0	<a href="#">Download</a>
<input type="checkbox"/> skustack®	4.18	<a href="#">Download</a>
<input type="checkbox"/> 4D Scale	3.1.5	<a href="#">Download</a>

A blue arrow points to the 'Download' link for ShipBridge.

Only the most recent version is displayed on this page. If you need an older version, click the application name to see the [Release History](#). You will see details about current and previous releases, including the **version number**, **release summary**, and **release date**. The latest version is always shown on the top row.

## Release History

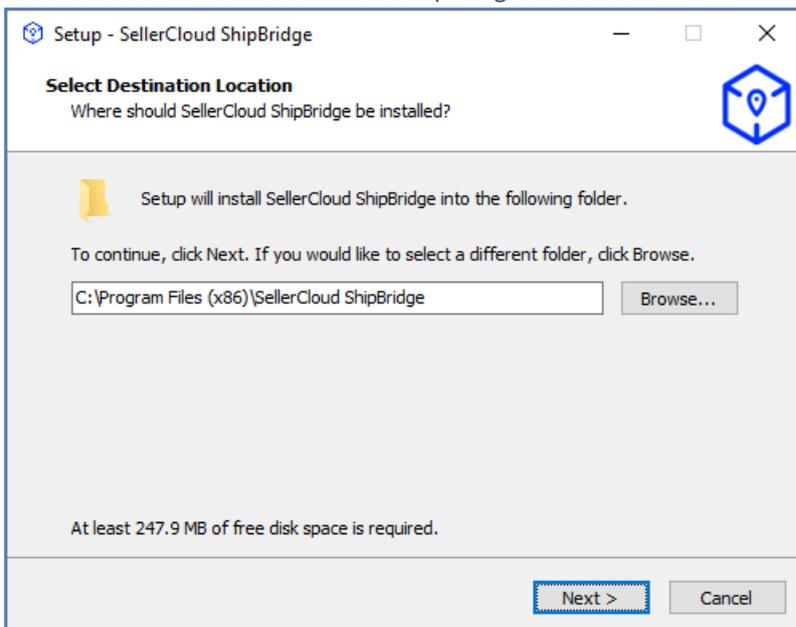

#	Release Summary	DBVS Version#	Updated	Download
5.9.8.6	<p>Added a missing functionality, that allows to apply shipping preferences per qty for multiple packages.</p> <p>Fixed a bug with Package editor not updating dimensions in Scan and Ship.</p> <p>Fixed a bug with invoice printing when the options to send label and invoice to the printer as one command is set.</p>		4/8/2024 10:43:43 AM	<a href="#">Download</a>

## Install Shipbridge

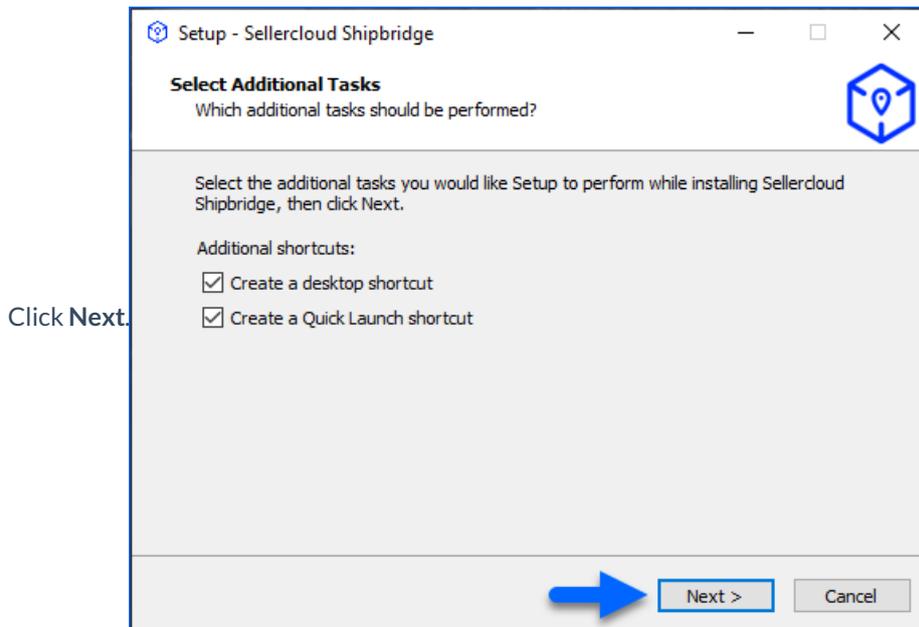

To install **Shipbridge** on your computer, you must enter your Sellercloud credentials to verify your account and configure your settings. Refer to the steps below to set up your installation.

You can't set up your installation without configuring your settings. If you don't know which particular options you might need, simply leave the default values. You can always adjust this configuration after the installation.

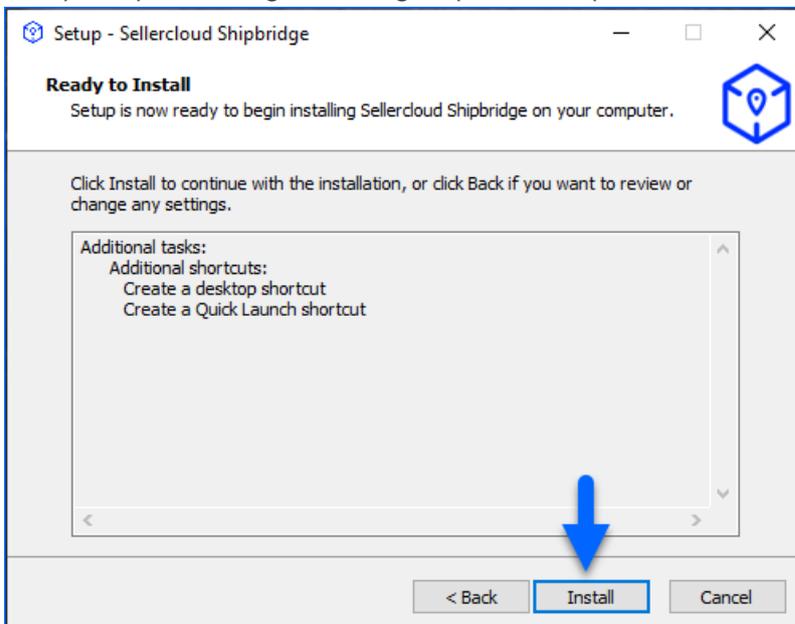

1. Run the **ShipbridgeSetup-*<version>*.exe** file. The **Setup** window will pop up.
2. Select the destination folder where Shipbridge should be installed.

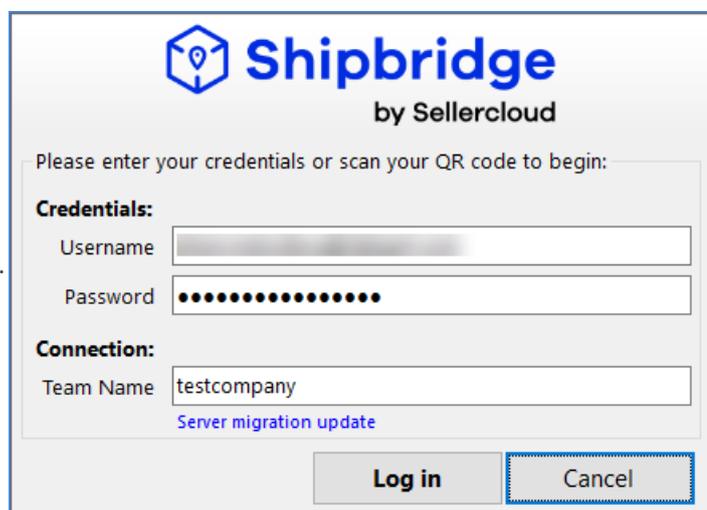

3. In **Select Additional Tasks**, both shortcut options are checked by default. If needed, you can uncheck them.

4. Verify the options configured during the previous steps > **Install**.

5. Enter your Sellercloud credentials > **Log in**.

6. Once your credentials are verified successfully, proceed with the Shipbridge configuration process. During

this step, you will be prompted to set up some basic Shipbridge settings, e.g., your shipping and invoice preferences, [Dazzle Settings](#), etc. These can also be adjusted later on in the **Options** window or via the [Configuration Wizard](#).

7. Click **Next** to complete the remaining carrier configuration steps.

Options

 **Shipbridge**  
by Sellercloud

**Please select which programs you would like to use.**

DAZzle       Endicia Label Server       None       ExpressOne
