

# Amazon Shipping

04/30/2025 3:10 pm CDT

## Overview

Efficient order fulfillment and reliable delivery services are key to achieving customer satisfaction and driving business success. Among the endless available options, **Amazon Shipping** stands out as a solution.

**Amazon Shipping** is a delivery service that enables you to leverage Amazon's extensive delivery network for fulfilling not only your Amazon orders but also those from your own website and other sales channels. Simply purchase a label and arrange a pickup directly from your warehouse.

**Amazon Shipping** also grants you control over the delivery process – you have visibility and influence over your packages' handling, tracking, and delivery. You have flexibility in adapting shipping strategies according to your specific business requirements while using Amazon's last-mile delivery capabilities. [Sign Up](#) to get started.

Note that Amazon Shipping is **not** to be mistaken with:

- **Amazon Buy Shipping**, which allows you to purchase shipping labels through Amazon for multiple established carriers such as FedEx, UPS, USPS, Amazon Shipping, and more. To learn more, see [Amazon Services: Buy Shipping in Shipbridge](#) and [Amazon Services: Buy Shipping in Bulk](#).
- **Fulfillment by Amazon (FBA)**, which involves sending your products to an Amazon Fulfillment Center, so Amazon can handle the storing, picking, packing, and fulfillment of orders. To learn more, refer to our [FBA Help Category](#).

As a Sellercloud user, you can use Amazon Shipping when shipping from [Shipbridge](#) or from [Sellercloud's web interface](#). This article guides you through both options step by step.

---

## Prerequisites

To use Amazon Shipping:

- You must be a [registered Amazon merchant](#).
- You must [sign up for Amazon Shipping](#).
- Your pickup address must be registered with Amazon Shipping. Contact your account manager for assistance.

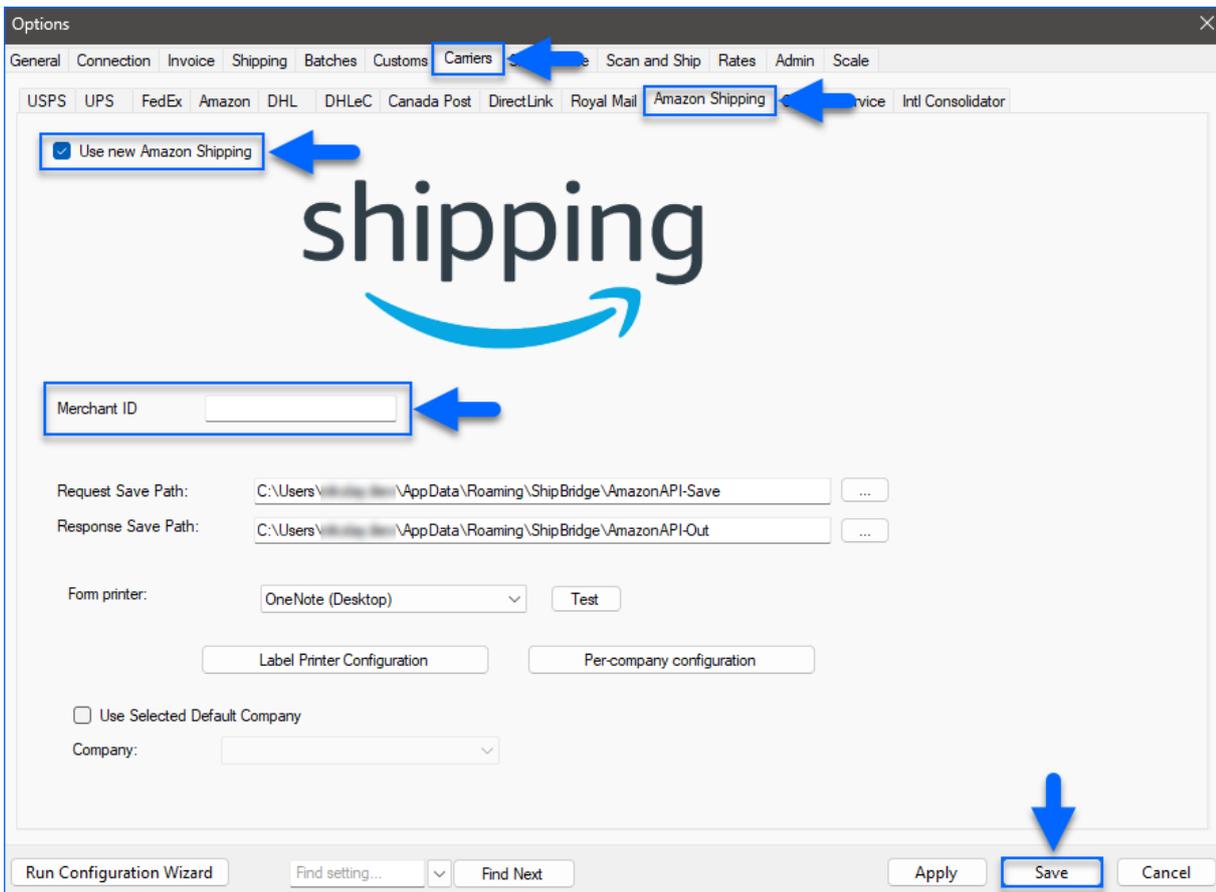

To be able to use this functionality in Shipbridge, you must be running [Version 5.8.9.7](#) or later.

---

## Amazon Shipping in Shipbridge

[Shipbridge](#) is the primary tool used to ship orders and generate shipping labels. To ship orders with Amazon Shipping in Sellercloud's Shipbridge application, you must first configure your credentials:

1. Open Shipbridge.
2. Click **Menu** and select **Options**.
3. Select the **Carriers** tab and then the **Amazon Shipping** sub-tab.
4. Enter your [Amazon Merchant ID](#) in the **Merchant ID** field.
5. Check the **Use new Amazon Shipping** box on top and click **Save**.

Walmart Marketplace and eBay may have restrictions on shipping their orders via Amazon Logistics. We recommend enabling the **Exclude Amazon Shipping Standard from Walmart and eBay orders** setting in the **Amazon Shipping** tab to ensure the service is not selected by mistake.

## Ship and Print Labels

To ship orders with Amazon Shipping and print labels in Shipbridge:

1. In Shipbridge, select the order to ship.
2. Right-click and choose **Calculate Rates**. Amazon Shipping is **Amazon Shipping Ground** in the carriers list.

Carrier	Packaging	Base Rate	Final Rate	Days	Merch...
Amazon Shipping Ground		\$2.00	\$2.00	2	
USPS Library		\$2.61	\$2.61	8	
USPS Media Mail		\$2.75	\$2.75	5	
DHLc Parcel Expedited		\$4.22	\$4.22		
DHLc Parcel Plus Ground		\$4.51	\$4.51		
DHLc Parcel Plus Expedi...		\$4.60	\$4.60		
DHLc Parcel Expedited ...		\$5.49	\$5.49		
USPS Priority	Flat Rate Envelope	\$6.95	\$6.95	2	
USPS Parcel Select		\$7.18	\$7.18	5	
USPS Priority		\$7.28	\$7.28	2	

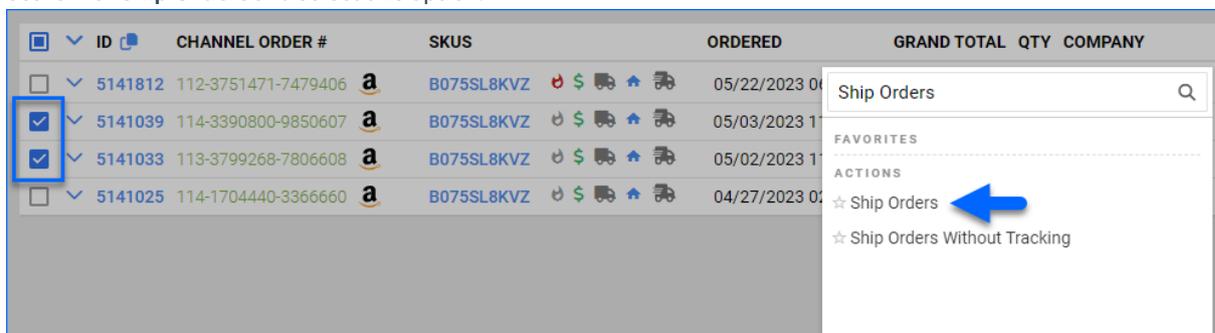

3. Amazon Shipping is **Amazon API Ground** in the **Carrier** column on orders in the grid.
4. With an order selected, right-click and select **Ship and Print Labels**.

If you use Shipbridge's Scan and Ship service, select **Amazon API Ground** from the **Shipping Service** dropdown. Learn more about [Shipping Orders in Shipbridge](#) and [Scan and Ship](#).

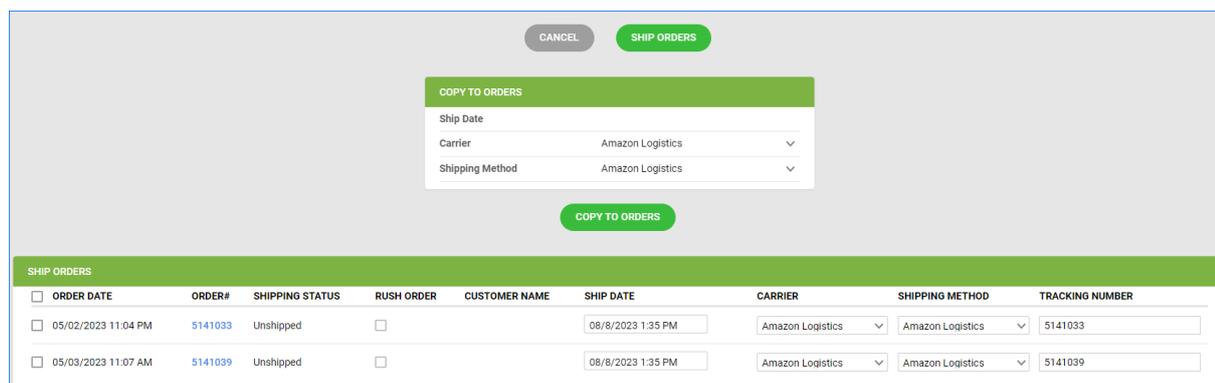

# Amazon Shipping in Sellercloud

Generating shipping labels is typically handled within [Shipbridge](#). However, in some cases, you may want to process an order's shipping using Sellercloud's web interface. For example, you may want to mark your orders as completed and enter tracking information for them if you have already purchased the labels from Amazon directly. To ship orders with Amazon Shipping in Sellercloud's web interface:

1. Go to **Orders > Manage orders**.
2. Click the **Search** button to see all orders, or use the filters on top to see specific orders.
3. Check the boxes on the left to select orders.
4. Click the **Actions** icon on the bottom right.
5. Search for **Ship Orders** and select this option.

6. To fulfill all orders with Amazon Shipping, in the **Ship Orders** panel:
  - a. Select the **Ship Date**.
  - b. Set the **Carrier** to **Amazon Logistics**.
  - c. Set the **Shipping Method**.
  - d. Click the **Copy to orders** button.
7. Alternatively, you can select the **Ship Date**, **Carrier**, and **Shipping Method** and enter the **Tracking Numbers** individually for each order. Learn how to do that [here](#).
8. When you are ready, select the orders you want to ship by checking the boxes on their left and clicking the **Ship Orders** button on top.

If the action is successful, you will see a notification saying **Order Shipping updated**, and your orders' **Shipping Status** will be set to **Fully Shipped**. Sellercloud uses [Swiship Tracking](#) for orders fulfilled via Amazon Logistics.

**Amazon Shipping** can also be selected as a carrier when using the [Buy Shipping](#) service, [individually](#), [in bulk](#), and in [Shipbridge](#). Ensure that you have the delivery service enabled for your company under **Toolbox > Amazon Settings > Bulk Shipping Preferences**.
