

Receivebridge Overview

04/30/2025 3:11 pm CDT

Overview

Receivebridge is our Purchase Order and RMA receiving module. Once installed on the user's desktop computer, Receivebridge can access PO and RMA-related information via Sellercloud's web services. Using Receivebridge will enable your receiving department to receive and update inventory without direct access to the rest of your Sellercloud platform.

Check out this short tutorial and topics on getting started!
