

# Order Fulfillment Overview

04/30/2025 3:17 pm CDT

## Overview

Sellercloud makes it easy to fulfill your orders with features like picklists, scan and ship, automated tracking number retrieval, and more. Additionally, third-party logistics that integrate with Sellercloud enhance and streamline your fulfillment workflows. See the topics below for a detailed explanation of Sellercloud's fulfillment process.

---

## First-Party Logistics

### Picklists

The feature generates a summarized list of product quantities needed to fill selected orders. Picklists facilitate accurate picking, packing, and shipping. You can automate their generation via plugins or scheduled tasks. Refer to the following articles for more details:

- Manually generate and manage [Picklists](#).
- Automate the execution and recurrence of routine processes through [Scheduled Tasks](#).

### Shipping

Order fulfillment and other shipping tasks are typically handled within Sellercloud's [Shipbridge](#) application. This powerful tool helps you manage various aspects of your shipping operations. You can:

- [Import](#) unshipped orders from your connected sales channels.
- [Generate labels](#) for your shipments.
- [Scan each unit](#) to ensure the correct items are shipped.
- [Batch ship](#) to process multiple orders simultaneously.
- [Validate addresses](#) to ensure prompt and accurate delivery.
- [Rate shop](#) to obtain quotes from multiple carriers simultaneously.

You can also process orders using Sellercloud's web interface.

- [Ship Orders](#) through Sellercloud instead of Shipbridge.
- [Shipping API](#) gives you access to shipping rates for different shipping partners within Sellercloud.
- [Link Order to PO \(Cross-Dock\)](#) offers a workflow for out-of-stock products.
- [Order Rule Engine](#) helps you automate various Order-related tasks.

### Track Delivery

Sellercloud's integrated shipping carriers (USPS, FedEx, and UPS) track the delivery status using the tracking number for each package. Refer to the following article for more details:

- [Track Order Delivery Status](#) automatically provides you with delivery information for your orders.
- 

## Third-Party Logistics

Sellercloud integrates with major third-party logistics providers so you can take advantage of their fulfillment

services.

- [Fulfillment by Amazon \(FBA\)](#) allows Amazon to handle the entire order fulfillment process by storing your inventory in their fulfillment centers.
  - [Walmart Fulfillment Service \(WFS\)](#) is a convenient solution provided by Walmart that enables you to store inventory in their warehouses and have them handle the storage, packing, and shipping of your products.
  - [CastleGate](#) offers logistics and supply chain solutions provisioned by Wayfair, similar to FBA.
  - Others:
    - [Extensiv \(3PL Central\)](#)
    - [Flexport \(Deliverr\)](#)
    - [Shipwire](#)
    - [Xpert Fulfillment](#)
- 

## Dropshipping

Dropship an order from a vendor directly to a consumer within Sellercloud's interface. This removes the need for picking, packing, shipping, and managing your inventory.

- [Dropship](#) orders from vendors to customers.
  - [Create and Manage Vendors](#) to easily configure their profiles in Sellercloud.
  - [Vendor SKUs](#) let you control your products' prices across multiple vendors.
  - [Tracking Import for Orders and POs](#) optimizes the transmission of tracking information with standardized templates.
  - [Inventory when Dropshipping](#) manages stock and inventory of dropship orders.
  - [Vendor Invoices](#) allow you to track payments at the vendor level.
- 

## Additional Resources

- [Skustack](#) – Sellercloud's warehouse management system helps you organize your storage facility, accurately track inventory and its location within your warehouse down to the shelf, and oversee daily activities.
  - [Skublox](#) – Shipping the right items to your customers is a crucial aspect of day-to-day warehouse operations. Skublox simplifies your sorting workflow and reduces fulfillment errors.
  - [4D Scale](#) – Capture the weight of every new product entering your warehouse during the receiving process, or quickly weigh and measure box dimensions to calculate shipping rates for your fulfillment operations.
