

Bulk Edit Products

04/30/2025 3:20 pm CDT

Overview

The **Bulk Edit Products** feature allows you to update key details across multiple SKUs simultaneously. This is useful when you need to do a quick update of **Channel-Specific categories, Product Type, Default Vendor, Brand, Shipping Preferences**, and more.

While this functionality allows you to bulk edit products directly within the interface, you also have the option to use a file import instead. Learn more in our dedicated articles:

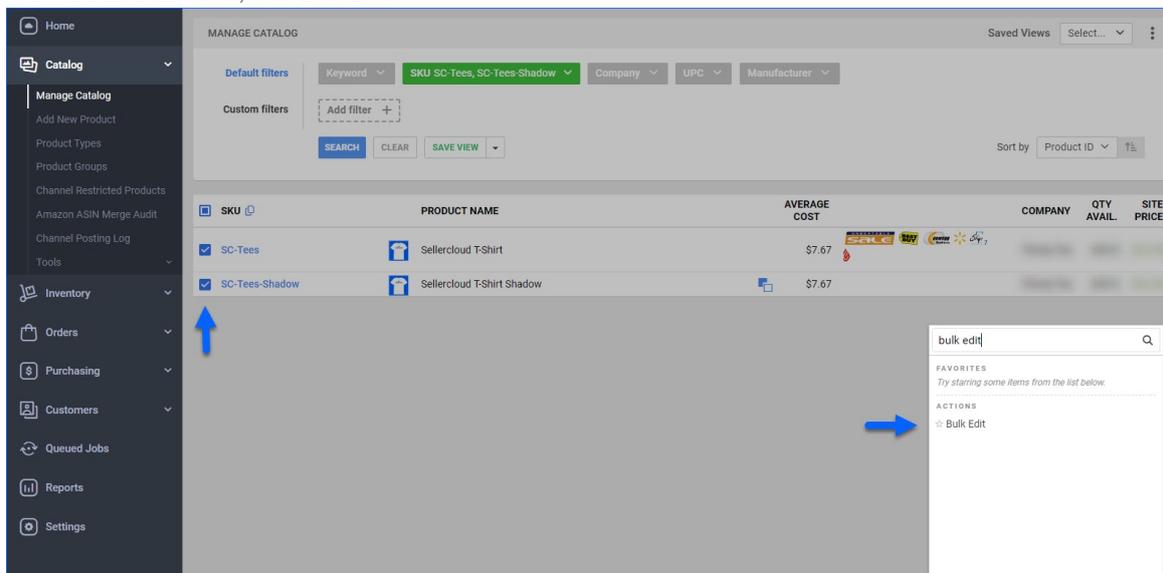

- [Bulk Update Products](#)
- [Bulk Update Columns](#)

- [Import Product Information](#)

Bulk Edit Products

You can edit multiple products' details and properties using the bulk editing feature. However, keep in mind that **Shadow Persistency** ensures that certain properties remain consistent between parent SKUs and their shadows. Some product data, like **Inventory Quantity**, is always shadow-persistent and cannot be disabled. Bulk editing products does not support assigning different values to the same field across multiple products.

To bulk edit products:

1. Go to **Catalog > Manage Catalog**.
2. Search for your SKUs and select them.
3. From the **Action Menu**, click **Bulk Edit**.

In the pop-up modal, you will see:

1. **Selected Products** – This panel displays which SKUs you selected to **Bulk Edit**.
 - a. **Product ID** – A hyperlink that redirects to the related [Product Details](#) page.
 - b. **Product Name** – The SKU's Sellrcloud Name.

- c. **Is Shadow** – An indication if the SKU is a **Shadow Product**. This is important due to **Shadow Persistence** considerations, as described [above](#).

BULK EDIT ✕

SELECTED PRODUCTS

| SKU | PRODUCT NAME | IS SHADOW |
|--------------------------------|----------------------------|-----------|
| SC-Tees | Sellercloud T-Shirt | |
| SC-Tees-Shadow | Sellercloud T-Shirt Shadow | |

Displaying results 1-2 of 2

Note: Only selected properties will be edited. The unselected properties will be ignored.

2. **Fields to Edit** – This panel lists available product details you can update for all the selected SKUs.

- a. If any of the selected products are **Shadows**, there will be an indication and tooltip next to each field configured as **Shadow Persistent**.
- b. Only the product fields you select will be updated, and the rest will be ignored.

Note: Only selected properties will be edited. The unselected properties will be ignored.

FIELDS TO EDIT

| <input type="checkbox"/> FIELD NAME | VALUE | |
|--|---------------|-----------------|
| <input checked="" type="checkbox"/> Amazon Category | ACCESSORY | ▼ |
| <input type="checkbox"/> Brand ? | Select | ▼ |
| <input checked="" type="checkbox"/> Country of Origin ? | United States | ▼ |
| <input checked="" type="checkbox"/> Default Vendor | Vendor 1 | ▼ |
| <input type="checkbox"/> Dropship Mode ? | <i>Text</i> | |
| <input type="checkbox"/> Ebay Category 1 | <i>Text</i> | Select Category |
| <input type="checkbox"/> Ebay Category 2 | <i>Text</i> | Select Category |
| <input type="checkbox"/> Ebay Descr...n Template ? | Select | ▼ |
| <input type="checkbox"/> Ebay Payment Policy | Select | ▼ |
| <input type="checkbox"/> Ebay Returns Policy | Select | ▼ |

3. After you have configured all the necessary values, click **Update**.
