

Manage Catalog

04/30/2025 3:21 pm CDT

Overview

The **Manage Catalog** page gives you quick access to all your products. On this page, you can:

- See products in your Sellercloud account
- Use search filters to show only specific products
- Save your search filter setups so you can repeat searches quickly and easily
- Sort the products from your search results based on different product data fields
- Show or hide product data fields from the search results grid
- Perform a wide range of actions on products individually or in bulk

While it might seem similar to the [Manage Inventory Page](#), the Manage Catalog page lets you oversee product properties and characteristics instead of inventory functions.

Page Overview

To access your product catalog, go to **Catalog > Manage Catalog**.

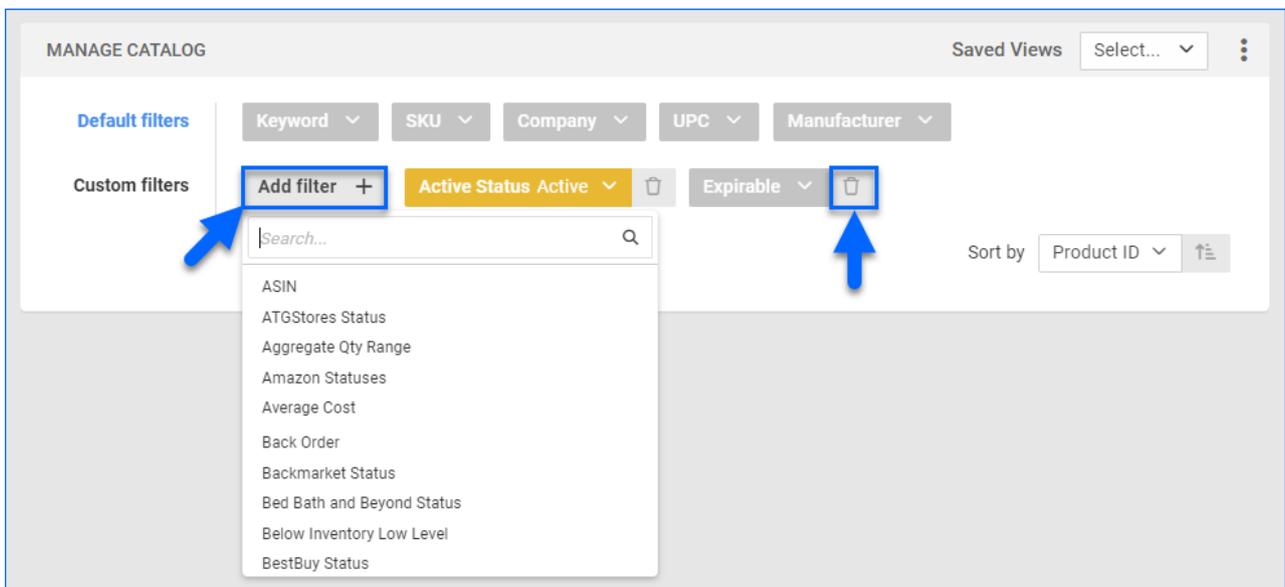

The Manage Catalog page consists of three key components:

- **Search Filters** – A wide range of search options that let you narrow down your search results and show only the products you are interested in. You can save specific searches for repeat use.
- **Search Results** – A list of products that match your search criteria. You can sort it differently and even show or hide different data columns.
- **Actions** – A wide range of product-related actions you can perform on one product at a time or in bulk. These actions help you manage your products both within Sellercloud and in connected sales channels.

Search Filters

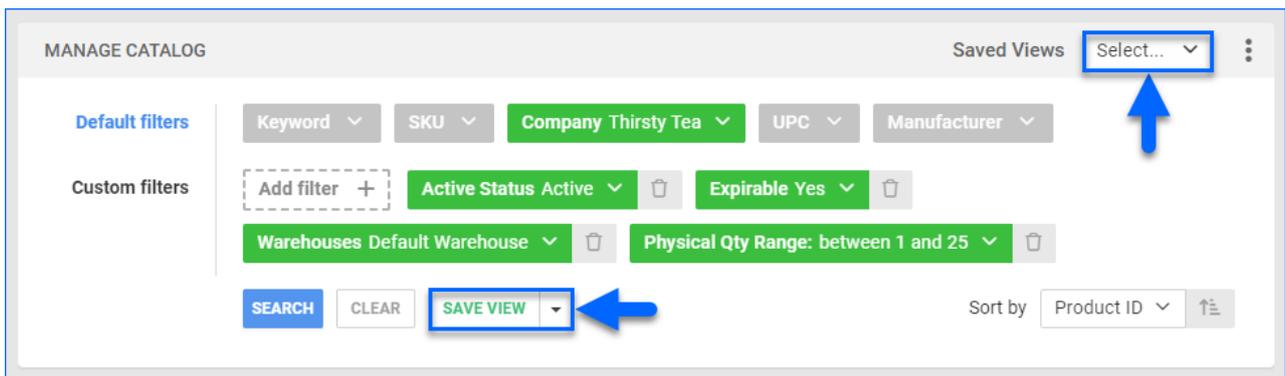

Filters offer multiple-choice selection lists or allow you to enter specific values. Your choices build on each other. Each subsequent choice narrows the scope of your search results further and affects what the page displays. You can add as many filters as you like or none at all.

There are **Default filters** that are always displayed and **Custom filters** that you can display manually by clicking the **Add filter** button and selecting a filter from the list. To remove a custom filter from the page, click the **Trash** icon next to it.

After you click **Search**, each filter you apply gets highlighted in orange or green. If a filter is gray or not displayed at all, it's not active. You can add or remove filters and search again at any time.

Once you have set up your filters, you can click **Save View** to save the search. Then, you can repeat the same search by selecting it from the **Saved Views** menu on the top right.

If the built-in filters are insufficient, you can contact [Sellercloud Support](#) and ask them to create custom columns for product-related information. Then, you can enable the columns as described in [Product Custom Columns](#), and they will appear in the **Custom Filters** list, where you can use them to search.

For a list of all filters and their descriptions, see the [Filter Descriptions](#) section of this article.

Search Results

The search results show a list of products matching your search criteria. This list is comprised of various data columns showing product information.

There are two levels of columns. **Level 1** columns are always visible. There are also **Level 2** columns – when available, you can view them by clicking the small blue arrow to the product's left. This provides you with more information about [Variation Products](#) without having to open the product details.

<input type="checkbox"/> SKU	PRODUCT NAME	AVERAGE COST	UPC
<input type="checkbox"/> !!!!@FGSA	2019 Planner + (Weekly & Monthly) Planne...Monthly Wall Calendar, 8.3 x 8.7 (Black)	\$23.55	9781617292231
<input type="checkbox"/> !!!!@FGSA CLONE	2019 Planner + (Weekly & Monthly) Planne...Monthly Wall Calendar, 8.3 x 8.7 (Black)	\$23.55	9781617292231

The grid column Channel displays the logos of the channels for which each product is enabled. Click on the logo to open the channel-specific properties of the SKU. Additionally, the logo for products that are **Posted and Active** on Amazon will be displayed in color, while enabled-only SKUs will be shown with a greyed-out logo.

Now you can:

- Reorder columns by dragging them up or down in the list
- Hide columns by clicking the **Trash** icons
- Add columns by clicking **Add column**

You can also sort the products in a different order based on a specific column using the **Sort by** drop-down menu.

For a list of all data columns and their descriptions, see the [Column Descriptions](#) section of this article.

Actions

The Manage Catalog page also offers a wide range of actions you can perform on one product at a time or in bulk. These actions help you quickly manage your products both within Sellercloud and in connected sales channels.

The **Actions** icon is located on the bottom right of the page. By default, it is a green plus icon that allows you to create a new product. When you select products from the search results by checking the boxes to their left, the icon turns blue. Once it's blue, you can click it to perform actions on selected products.

<input type="checkbox"/>	SKU	PRODUCT NAME	AVERAGE COST	CHANNELS	COMPANY	QTY AVAIL.	SITE PRICE
<input checked="" type="checkbox"/>	SC-Hat	Sellercloud Hat	\$5.00		Thirsty Tea	8951	\$15.00
<input checked="" type="checkbox"/>	SC-Socks	Sellercloud Socks	\$3.00		Thirsty Tea	8948	\$10.00
<input checked="" type="checkbox"/>	SC-T-Shirt	Sellercloud T-Shirt	\$10.00		Thirsty Tea	8951	\$20.00

3 selected

You can use the search engine to find a specific action quickly. Click the **Star** icon next to any frequently used action to pin it to the top of the actions list for quick access.

FAVORITES
Try starring some items from the list below.

ACTIONS

- Clone SKU...
- Create Shadows...
- Add Products To Group...
- Remove Products From Group...
- Load Product Defaults
- Launch on Channel...
- Set As Active
- Set As Inactive

Most of these actions will display a notification at the bottom of the screen when used, telling you that a **Queued Job** has been created. You can click the link to the queued job to view it. Make sure to refresh the page to update the job's **Status**.

For a list of all actions and their descriptions, see the [Action Descriptions](#) section in this article.

Descriptions

This section lists and defines all available elements on the Product Details page. This includes the filters for searching, the columns that display product data and sort results, and the actions you can perform on selected products. This article lists the elements by category for your convenience.

Filter Descriptions

Refer to the lists below for all **Default/Custom filters** and their descriptions.

Basic Information

Filter	Description
Brand	Filter products by one or more Brands .
Company	Filter products by one or more Companies .
Created By	Show only products created by a specific Employee .
Manufacturer	Show products produced by one or more Manufacturers .
Manufacturer By Company	Show products produced by one or more manufacturers added to a specific company. You can see the company name along with the manufacturer while searching.
Product Group	Show products that are or are not in a specific Product Group .
Product Types	Show only products from one or more Product Types .
Conditions	Show products based on one or more Product Conditions .
Expirable	Show only products that are or are not Expirable .
Is Digital	Show only products that are or are not Digital .
Is Hazmat	Show only products that are or are not considered Hazardous .
Replenishable	Show products that are or are not Replenishable .
Images	Show products with or without Images .
Keyword	Show products based on text in their SKU or product name.
Priority	Show products based on their priority, from 0 to 10.
Rating	Show products based on their rating, from 0 to 10.
Dropship Modes	Show only products that are set to ship from the manufacturer, vendor, or site.
Fulfilled By	Show only products that are or are not Fulfilled by Amazon .
Restricted Type	Show only products that are or are not restricted on specific channels.
Restricted	Show only products that are restricted on one or more channels.

Identifiers

Filter	Description
SKU	Filter products by their Sellercloud Stock Keeping Unit (SKU) .
Vendor SKUs	Filter products by Vendor SKU .
Manufacturer SKU	Filter products by Manufacturer SKU .
Master SKU	Filter products by Master SKU .
Merchant SKU	Filter products by Merchant SKU .
Has UPC	Show products with or without a Universal Product Code (UPC) .
UPC	Filter products by UPC .
ASIN	Filter products by Amazon Standard Identification Number (ASIN) .
Serial#	Filter products by Serial Numbers .
EAN	Filter products by European Article Number (EAN).
GTIN	Filter products by Global Trade Item Number (GTIN).
FNSKU	Filter products by Fulfillment Network Stock Keeping Unit (FNSKU) .
Channel Listing ID	Filter products by a channel listing ID.

Date and Time

Filter	Description
Creation Date Range	Filter products by predefined creation time ranges.
Created On	Filter products by custom creation date ranges.
Last Aggregate Date Range	Filter products by predefined inventory aggregation time ranges.
Last Aggregate Date	Filter products by custom inventory aggregation date ranges.
Modified On	Show only products modified within a custom date range.
No Sale In Days	Show only products that haven't been sold in predefined time ranges.
Sold In Days	Show only products that have been sold in predefined time ranges.

Inventory and Purchasing

Filter	Description
Active Status	Show only Active or Inactive Products .
Aggregate Qty Range	Show only products within a custom Available Qty range.
Back Order	Show only products within a custom Backorder quantity range.
Below Inventory Low Level	Show only products that are or are not below the Inventory Low Level .
Bin Ids	Show only products stored in specific Bin IDs .
Default Vendors	Show only products under one or more Default Vendors .
Disconnected From Channel	Filter products that are Disconnected from a channel.
Discontinued	Filter products to include or exclude Discontinued items.
FBA Shipment ID	Show only products that are in specific FBA Shipments .
Has Location Notes	Show only products with or without location notes.
Location Notes	Show only products that contain or don't contain specific location notes.
Manual Reserves	Show only products with or without Manual Reserves .
On Order	Show only products that are or are not on order.
Physical Qty Range	Show only products within a custom Physical Inventory quantity range.
Picklist ID	Show only products that are on a specific Picklist .
PO IDs	Filter products by specific Purchase Order (PO) IDs.
Purchasers	Show only products bought by one or more purchasers.
Reserved Qty Range	Show only products within a custom Reserved inventory quantity range.
Vendors	Show only products sold by one or more Vendors .
Warehouses	Show only products in one or more Warehouses . Check the Consider Shadow & Parent Inventory box to get results based on the overall quantity of all related Shadows .

Product Relationships

Filter	Description
Include Related Kits	Filter products to include or exclude related Kits .
Include Related Shadows	Filter products to include or exclude related Shadows .
Kit	Show or exclude products based on whether they are or are not a Kit Parent or Kit Component .
Kit Type	Show only specific kit types – Independent , Main Component , or All Components .
Shadows	Show or exclude products based on whether they are or are not a Shadow or Shadow Parent .
Variations	Show or exclude products based on whether they are or are not a Variation Parent or Child .

Cost and Pricing

Filter	Description
Average Cost	Show only products whose Average Cost is within a specific range.
Last Cost	Show only products whose Last Cost is within a specific range.
Site Cost	Show only products whose Site Cost is within a specific range.
Site Price	Show only products whose Site Price is within a specific range.
MAP Price	Show only products whose MAP Price is within a specific range.
Rebate	Show only products with or without a Rebate .

Channel-Specific Filters

This page also includes many channel-specific filters, most of which allow you to check which products are enabled or disabled for particular channels. Some of these filters can even show you additional details, such as whether a

product is ready for posting or not, whether it has already been posted or not, and more.

Note that not all channel-specific filters are listed below. To find all filters related to a channel, type the channel's name in the search on top of the **Add filter** drop-down menu.

Filter	Description
Amazon Statuses	Filter products by Amazon status.
eBay Category	Filter products by eBay category.
eBay Item ID	Filter products by eBay Item ID.
eBay Statuses	Filter products by Amazon status.
eBay Store Category	Filter products by eBay Store category.
eBay Top Title	Filter products by eBay top title.
Lightspeed POS Status	Filter products by Lightspeed POS status.
Lightspeed POS ItemID	Filter products by Lightspeed POS ItemID.
NewEgg.com Business Status	Filter products by NewEgg.com Business status.
NewEgg.com Item#	Filter products by Newegg.com Item ID.
NewEgg.com Statuses	Filter products by Newegg.com statuses.
Walmart Marketplace ID	Filter products by Walmart Marketplace ID.
Walmart Marketplace Statuses	Filter products by Walmart Marketplace statuses.
Website Categories	Filter products by website categories.
Website Product IDs	Filter products by website product IDs.
Website Statuses	Filter products by website statuses.

Column Descriptions

Refer to the lists below for all data columns and their descriptions. You can show or hide these columns by clicking the three dots in the top right and selecting **Customize Columns**. You can also sort your results based on these columns with the **Sort by** menu.

Basic Information

Data Column	Description
Active Status	The product's status, either Active or Inactive .
Product Name	The name of the product.
Channels	The various sales channels or platforms the product is enabled for.
Company	The name of the Company associated with the product.
Product Type	The Product Type for categorization.
Image	Shows a thumbnail of the primary Product Image that expands when you hover over it.
Condition	The Product Condition .
Created On	The date when the product was created.

Cost and Pricing	
Data Column	Description
Average Cost	The Average Cost associated with purchasing the product over time.
Last Cost	The most recent amount you paid to buy the product.
Site Cost	The product's cost, either on the last PO when it is received or based on the Average Cost . See Product Costs for more information.
Site Price	The default product price for all channels.
Amazon Price	The price of the product when listed on Amazon.
Buy It Now Price	The fixed price for immediate purchase on eBay.
Fixed Price Qty	The quantity available for immediate purchase at the fixed price.
MAP Price	The Minimum Advertised Price (MAP) set for the product.
Wholesale Price	The price at which the product is available for wholesale purchase.
Active Rebate	Shows if there is an active rebate associated with the product.

Action Descriptions

Refer to the lists below for all actions and their descriptions.

General Product Management

Action	Description
Add New Product	Adds a new product to the catalog.
Delete	Removes the product from the catalog.
Change Product SKU	Updates the product's Stock Keeping Unit (SKU).
Clone SKU	Creates an exact Clone of the product with a new SKU.
Copy Product Data to Other SKU(s)	Copies product information to one or more other products.
Add Products To Group	Associates products with a specific Product Group .
Remove Products From Group	Disassociates products from a specific Product Group .
Load Product Defaults	Updates the selected products with defaults configured on the Company Settings > Defaults page.
Load Product Type Defaults	Updates the selected products with default settings and information configured a specific Product Type .
Resize Product Images	Adjusts the size or dimensions of the main Product Image .
Export Products (Catalog)	Allows you to use different methods to export specific product information in various formats.
Export Product Notes	Exports the product's ITF-14 Barcodes to an Excel spreadsheet.
Export Sell Through	Exports an Excel spreadsheet with the product's currently Available Qty and the Qty Sold for the last 7, 30, 60, 90, 120, 180, and 365 days.
Bulk Edit	Opens a modal that allows you to change certain product details for multiple SKUs at once. The modal displays the selected products, with an indication if any of them are Shadows . If any of the Fields to Edit are set as Shadow-Persistent , they will have an icon and tooltip to reflect this. If you edit a shadow-persistent field for a Shadow Parent , all related children will also be updated. Some of the available fields are Channel-specific categories, Default Vendor, Replenishable status, and Brand.
Status and Data Manipulation	
Action	Description
Adjust Priority	Changes the priority level assigned to the product.
Adjust Rating	Changes the rating given to the product.
Set As Active	Activates the product within Sellercloud and, if set up, sends inventory to channels.
Set As Inactive	Deactivates the product within Sellercloud and sends 0 inventory to channels.
Set As Discontinued	Marks the product as discontinued and unavailable for purchase from vendors.
Set As Not Discontinued	Reverses the discontinued status of the product.
Convert Currencies	Converts existing product costs and prices to a different Currency .
Export ITF-14 Barcodes	Exports the ITF-14 Barcodes associated with the product to a PDF file.
Export ITF-14 Barcodes (Excel)	Exports ITF-14 Barcodes in Excel format.
Generate Predicted Purchase Data	Generates Predictive Purchasing data for the product.

Get Info From NewEgg.com Retrieves product information from NewEgg.com based on the selected products' **UPC** (or **Manufacturer Name / Manufacturer SKU** if there's no **UPC**) and exports it to an Excel spreadsheet.

Get ASIN From UPC Obtains **Amazon Standard Identification Numbers (ASINs)** based on the product's **Universal Product Codes (UPCs)** in Sellercloud and Amazon.

Find ASIN Searches and identifies **Amazon Standard Identification Numbers (ASINs)** for products.

Product Relationships Management

Action **Description**

Create Shadows Generates **Shadow Products**.

Unshadow From Parent Separates a shadow product from its parent.

Break Kit/Unkit Dissolves a **Kit Product** into separate products.

Disassemble Variations Breaks down **Product Variations** into individual items.

Add to Kit Assembles multiple products into a kit product.

Order Management

Action **Description**

Add to Order Starts creating a new order with the selected products in it.

View Orders Accesses and displays existing orders with the selected products.

Print Labels Generates and prints **Product Labels**.

Add to PO Starts creating a new purchase order with the selected products in it.

Add to PO (With PO FBA Planning) Incorporates the product into an existing or new purchase order along with an **FBA Shipment**.

General Channel Management

Action **Description**

Launch on Channel Initiates product listings on the selected sales channel.

Enable/Disable For Channel Enables or disables a channel integration for the selected products.

Update Inventory on Channel Adjusts the product's stock levels on a channel based on the inventory available in Sellercloud.

Update Prices on Channel Updates the product's prices on a channel based on the prices set in Sellercloud.

Connect To Inventory Links the product to the available inventory, allowing Sellercloud to send inventory updates to a channel.

Disconnect From Inventory Disassociates the product's connected inventory from a channel.

Disconnect From Price Update It allows you to stop all pricing updates for selected products on Amazon, eBay, or Walmart Marketplace.

Update Images On Channel Updates **Product Images** on the channel based on the images set in Sellercloud.

Export Channel Info Exports channel-specific product information.

Restrict/Unrestrict For Channel Imposes or removes **Channel Product Restrictions**.

End Listing On Channel Removes the selected products' listings from a channel.

Export Channel Missing Information Exports an Excel spreadsheet file with data related to required and missing information on the channel.

Export Channel Category Suggestions Export an Excel spreadsheet file with channel category suggestions.

Amazon

Action **Description**

Get Info From ASIN Retrieves information from Amazon listings based on ASIN and updates the selected Sellercloud products. See **Get Info From Amazon** for more information.

Get My Price From Amazon Obtains the product's price information from Amazon.

Update Shipping Template on Amazon	Updates the products' Amazon Shipping Template .
Update Dimensions/Weight on Amazon	Updates product dimensions and weight on Amazon.
Switch to AFN (Don't update Amazon)	Sets the product as Fulfilled by Amazon without updating Amazon.
Switch to AFN (Update Amazon)	Sets the product as Fulfilled by Amazon and updates Amazon accordingly.
Switch to MFN (Don't update Amazon)	Sets the product as Fulfilled by Merchant without updating Amazon.
Switch to MFN (Update Amazon)	Sets the product as Fulfilled by Merchant and updates Amazon accordingly.
Generate Predicted Purchase Data (FBA)	Generates Predictive Restocking data for FBA products.
Remove Business Prices on Amazon	Submits a feed to Amazon to remove the Business price from Amazon.
Get Amazon BuyBox Prices	Retrieves prices associated with the BuyBox from Amazon listings based on ASIN. See Get Amazon Buy Box Price for more information.
Find Amazon Sales Rank	Identifies the product's ranking within Amazon's sales categories.
Add to FBA Inbound Shipment	Adds the product to an FBA Shipment to an Amazon Fulfillment Center.

eBay

Action	Description
Get Info From eBay	Imports product information from eBay. See Get Product Info From Ebay for more information.
Revise on eBay	Pushes any changes to Sellercloud products to their listings on eBay.
Relist on eBay	Re-lists products on eBay for sale.

Walmart Marketplace

Action	Description
Get Info From Walmart	Imports product information from Walmart. See Get Product Info From Walmart for more information.
Walmart Marketplace Competitive Pricing Optin	Opts products in to Walmart Marketplace's Competitive Pricing program.
Walmart Marketplace Competitive Pricing Optout	Opts products out of Walmart Marketplace's competitive pricing program.
Walmart Marketplace Connect to Price Update	Allows Sellercloud to start sending price updates to Walmart Marketplace.
Walmart Marketplace Disconnect to Price Update	Stops Sellercloud from sending price updates to Walmart Marketplace.
Associate Predefined Shipping Templates on Walmart Marketplace	Links predefined Walmart Shipping Templates to the product on Walmart Marketplace.
Disassociate Predefined Shipping Templates on Walmart Marketplace	Removes the association of predefined Walmart shipping Templates from the product on Walmart Marketplace.
Launch on Walmart Marketplace using Setup By Match	Posts product listings on Walmart Marketplace using the Setup By Match method.
Bulk Convert Walmart V3 Attributes to V4	Converts Walmart V3 Product Attributes to V4 format in bulk.
Bulk Fix Walmart V4 Attributes	Corrects Walmart V4 product attributes in bulk after any V3 to V4 conversion issues.
Enable for WFS	Enables the product for Walmart Fulfillment Services (WFS).

Add to WFS Shipment	Adds the product to a WFS Shipment .
Generate Predicted Purchase Data (WFS)	Generates Predictive Restocking data for WFS products.
Assign Item To Repricer Strategy	Enables Repricing for the selected SKUs on Walmart Marketplace.
Unassign Item To Repricer Strategy	Disables Repricing for the selected SKUs on Walmart Marketplace.
Other Channels	
Action	Description
Get Overstock SKU and Option SKU	Retrieves the Overstock SKU and Option SKU information associated with the product from Overstock.
Get Lightspeed POS Item IDs	Obtains the Lightspeed POS Item ID for the product from Lightspeed.
Update Listing Part on Website	Update a specific part of the selected product's website listing, such as Categories, Description, Images Only, Inventory Cost, Metadata, Titles, or Variation Images .
Update Meta Fields on Shopify (Including Matrix Child)	Updates all meta fields on Shopify, including those for matrix child products.
Enroll Product in Returns Program For Wish	Enrolls the product in the Wish Returns Program.
Un-enroll Product in Returns Program For Wish	Removes the product from the Wish Returns Program.

Related Client Settings

The following [Client Settings](#) control elements of the Manage Catalog page:

- **Show Catalog Images In Manage Inventory** – when enabled, your Catalog Product Images will be displayed as the product thumbnail on the **Manage Inventory** page.
- **Show Large Product Images On Manage Catalog** – when you enable this setting, the thumbnail image on the **Manage Catalog** page will become bigger. However, this will also decrease the number of products displayed without scrolling down.

Overview

Sellercloud makes it easy to manage your product catalog, which includes creating new products and generating SKUs, product descriptions, and images. Additionally, you will be able to create product kits and shadow SKUs, all of which increase your products' exposure and versatility.
