

# Discontinued Products

04/30/2025 3:21 pm CDT

## Overview

When products are marked as discontinued, it typically indicates that the supplier has ceased production of those items and they have reached the end of their lifecycle in your inventory. The **Discontinued** status of a product is an internal Sellercloud status primarily used to prevent the ordering of products that are no longer being produced.

In contrast to items with an **Inactive** status, discontinued products won't be excluded from most default searches. They will appear in the grid with their rows highlighted in red for easy identification.

The discontinued status in Sellercloud is intended for internal reference only.

Discontinued SKUs cannot be added to [Purchase Orders](#) and will not display results in [Predictive Purchasing](#).

## Set As Discontinued

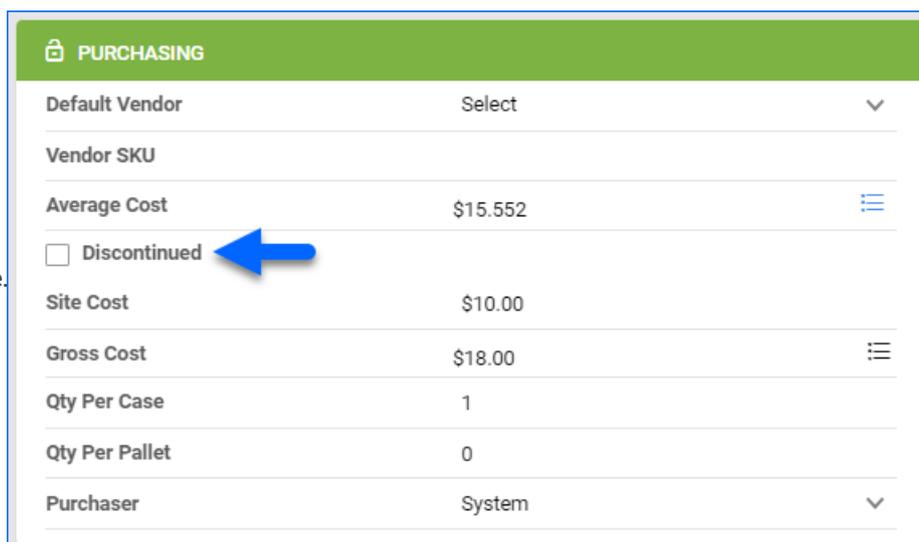

You can set products as discontinued individually or in bulk.

### Individually

To mark a product as discontinued, navigate to:

1. **Catalog > Manage Catalog > Open your Product.**
2. On the [Product Details Page](#), click **Edit**.
3. In the **Purchasing Panel**, deselect the **Discontinued** checkbox.

4. Click **Save**.

The screenshot shows the 'PURCHASING' panel for a product. It contains several fields with their current values and controls:

PURCHASING	
Default Vendor	Select
Vendor SKU	
Average Cost	\$15.552
<input type="checkbox"/> Discontinued	
Site Cost	\$10.00
Gross Cost	\$18.00
Qty Per Case	1
Qty Per Pallet	0
Purchaser	System

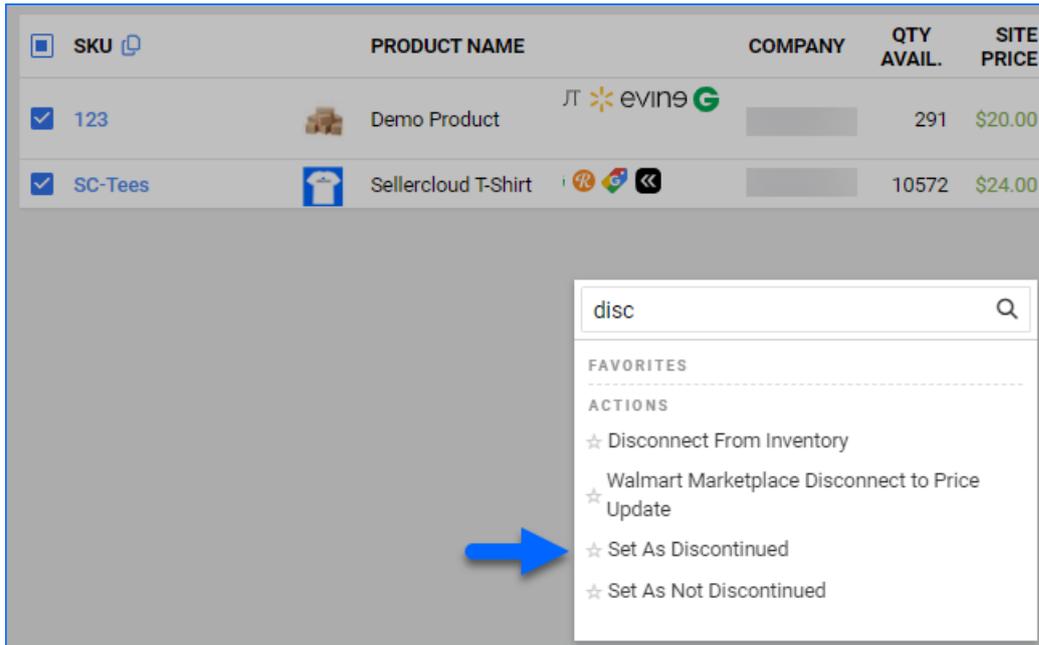

A blue arrow points to the 'Discontinued' checkbox, which is currently unchecked.

### In Bulk

To mark multiple products as discontinued, navigate to:

1. **Catalog > Manage Catalog > Select Products.**

## 2. Action Menu > Set As Discontinued.

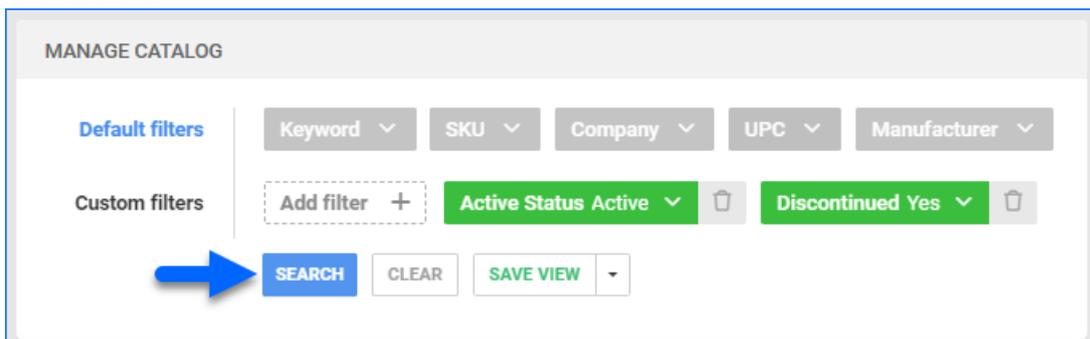

Alternatively, you can use our [Bulk Update Tool](#) with the [Column Header IsEndOfLife](#), where the acceptable values are either **True** or **False**.

## Filter Discontinued Products

You can filter your search to look for discontinued products.

1. Go to **Catalog > Manage Catalog**.
2. Locate the **Discontinued** filter and select **Yes** from the dropdown menu.
3. Click **Search**.

When a product is marked as Discontinued:

- We do not calculate QtySold.
- We show N/A for all QtySold fields

## Related Client Settings

The following [Client Settings](#) are available:

- **Do not allow to make product Inactive or Discontinued if has inventory**

- This setting prevents marking a product as inactive or discontinued as long as it still has remaining inventory. Inactive products are temporarily unavailable, while discontinued products are permanently removed from production and won't be sold again.
  - **Consider Kit Parent Discontinued If Kit Child Is Discontinued, In ManageInventory Grid**
    - When enabled, if the Kit Child product is marked as discontinued in the Manage Inventory grid, then the corresponding Kit Parent will also be marked as discontinued.
  - **Zero Out Discontinued Vendor Feed Products Inventory**
    - When enabled, this setting will reset the inventory count to zero for products received through a vendor feed that has been marked as discontinued.
