Related Products
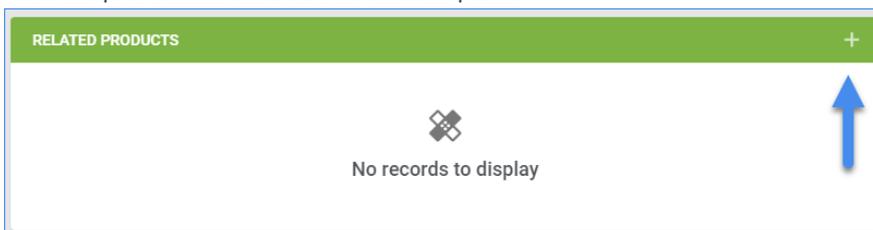

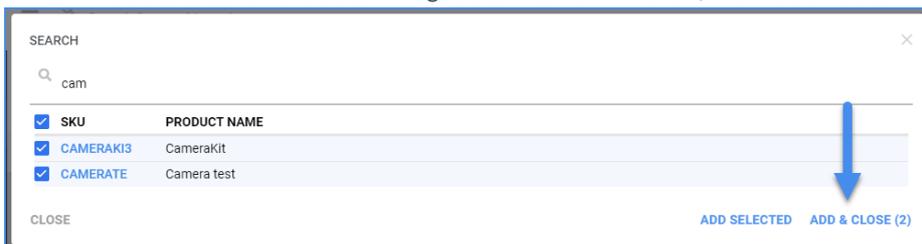

Overview

Sellercloud helps you create associations between products by adding *Related Products* to a product profile. These associations are only internal within Sellercloud to reference similar products. If you need to link inventory between related products when updating channel listings, you may refer to Sellercloud Support Team for a custom plugin. In this article, you will learn more about creating and managing your related products.
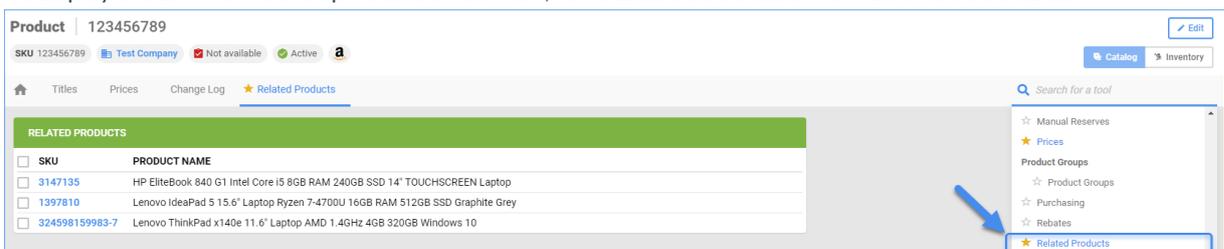

Add Related Products

1. Navigate to **Catalog** > **Manage Catalog**.

2. Open the product you want to add related products to.

3. Click **Toolbox**, and select **Related Products**.

4. In the upper right, click **Edit.**

5. Click the plus icon in the **Related Products** panel.

6. Search for the requested products and select them once they appear.

7. Click **Add Selected** to continue searching related items. If finished, click **Add & Close.**

8. Click **Save** to update your related products.

9. To display the list of all related products of the SKU, select **Related Products** from that SKU's **Toolbox**.

10. To remove related products, click the bin icon next to the desired SKU, or on the top to remove all selected products.
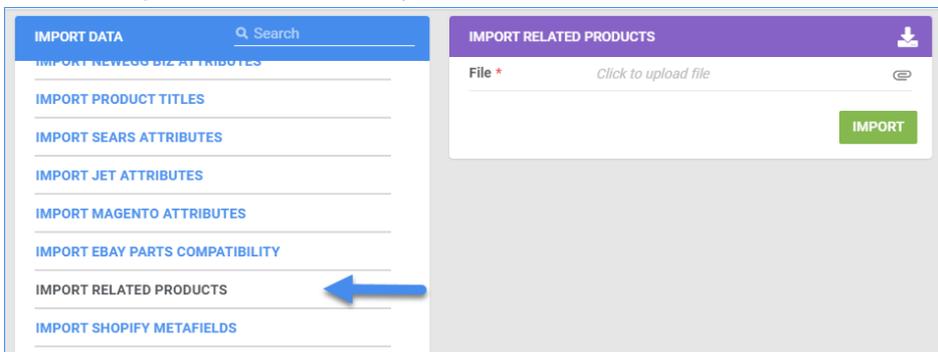

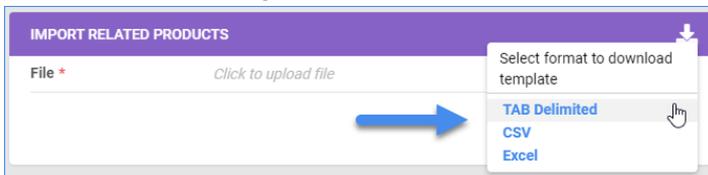

11. Save the changes.

Import Related Products

Sellercloud allows you to import related products in bulk via a file upload.

1. Access **Catalog** > **Tools** > **Import Product Info**.

2. Select the **Import Related Products** option.

3. If you need to generate a pre-configured template, click the **Download** icon on the top right and choose the desired format. Use the following column headers: **ProductID**, **RelatedProductID**.

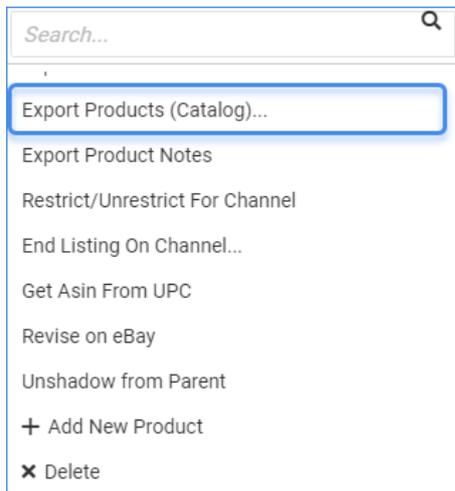

4. Attach the appropriate file.

5. Click **Import**.

To **delete** related items for multiple products, use the following column headers in the import file:**ProductID**, **RelatedProductID**, **Action**. Enter **DELETE** into the **Action** column for SKUs you want to remove. You can export a list of these products in order to save time by following the instructions below.
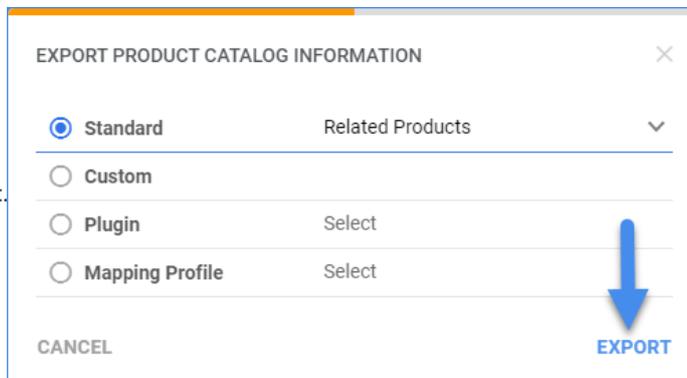

Export Related Products

To download related products for single or multiple SKUs, follow the steps described below.

1. Access **Catalog** > **Manage Catalog**.

2. Select the SKU(s) the related products of which you want to export.

3. In the bottom right, click the **Actions** menu icon, and select **Export Products (Catalog)**.

4. In the dialog box that appears, click the **Standard** option, and select **Related Products** in the dropdown list.

5. Click **Export.**

6. A Queued Job will be scheduled. Once it is processed, you can download the file from there.

Products can be configured as "related" to other products. This is typically used as an internal reference that can be used for looking up similar products. You will not be able to scan and ship a related product. You can scan and ship a replacement product. However, using a custom calc/plugin, inventory can be pulled from related products to update a listing on a channel. The custom inventory calculation can be created by the Sellercloud Development team and is subject to customization rates.

1. Open a product detail page.

2. Open toolbox and scroll down to **Related Products**.

3. Press **Add Product**.

4. Search for one or multiple products in the search window.

5. Select them and add as related products.

6. Both products will have the other product in their related products page.

Import related products

1. Navigate Inventory > Import Product Info >Import Related Products.

2. Download the template.

3. Populate and Import.
