Overview

Sellercloud's warehouse management system is a feature-rich tool intended to make organizing and managing inventory movements seamless. With the help of various easy-to-follow embedded wizards, you can:

- Track the warehouse movements of each product
- Synch inventory through multiple sales channels
- Organize warehouse storage locations and their components
- Make inventory adjustments
- Purchase products at Vendors, and make returns if needed
- Customize broadcasting inventory info to sales channels, and a lot more.
