Inventory Terms Explained
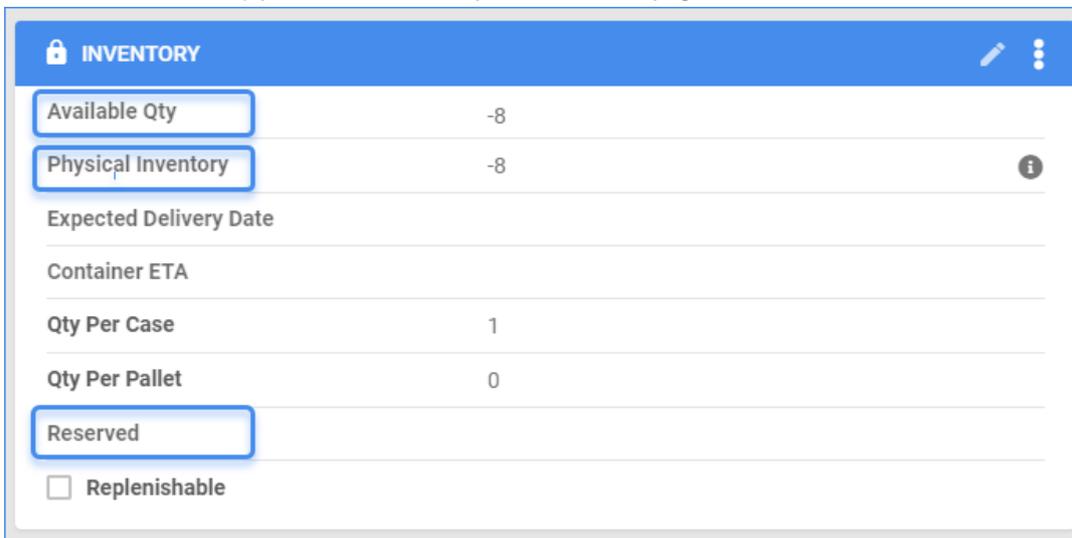

Overview

Sellercloud allows you to track inventory and re-calculate its quantity upon any inventory movement. The data on inventory changes is represented by specific **inventory terms** which are all stored on the relevant product page.

Inventory Terms on the Product Home Page

1. Access **Inventory** > **Manage Inventory**.

2. Select the product for the **inventory terms** you want to review.

3. Refer to the **Inventory** panel that is on the product's home page.

4. See the table below to learn more about the terms displayed.

INVENTORY TERM	DEFINITION
Available Qty (Aggregate Qty)	Reflects how many items of the selected product are available for sale. It includes **neither reserved quantities** nor those which are marked as **Non-Sellable**.
Physical Inventory	Reflects total inventory of a product that is available across warehouses. This can also include the items which are ordered but not shipped yet.
Reserved	Reflects inventory of a product that has been occupied by created Orders or manually reserved for channels.

Inventory Terms from Inventory Panel

1. Access **Inventory** > **Manage Inventory**.

2. Select the product for the inventory terms you want to review.

3. Click **Toolbox** and select **Inventory Movement**.

4. Alternatively, to open the **Inventory Movement** panel, click the three dots on the top-right corner of the **Inventory** pane (see below).

5. The **STATS** panel displays the complete list of inventory terms for the selected product.

6. See the table below to learn more about the terms displayed.

INVENTORY TERM	DEFINITION
Last Physical Inventory	The latest value of in-stock inventory quantity that has been set manually.
Total Inventory Change	Displays the total inventory adjustment entered.
Calculated Physical Inventory	The calculated number of the particular inventory that is currently available across all warehouses.
Reserved	The inventory which is **reserved** by open orders or manually reserved for channels.
Non Sellable Qty	The total number of inventory units available **across all unsellable warehouses**.

Calculated Available Inventory	The number of inventory units that are available for sale. This includes **neither reserved quantities nor those which are marked as Non-Sellable.**
Aggregate Qty (Sellable)	Shows the total of **Aggregate Qty** and **Reserved Qty** of the selected product.

Related Client Settings

Access **Settings** > **Client Settings** > **General Client Settings** > **Advanced**.

CLIENT SETTING	DEFINITION
Show aggregate inventory on Product Summary page	Select this option to enable view permission for the **Aggregate Qty** of inventory.
Show Reserved Qty Column in Manage Inventory Grid	Select the option to enable view permission for the **Reserved Qty** of inventory.
Show Physical Aggregate, Physical Sellable and Non-Sellable Qty in Manage Inventory Grid	Select the option to enable view permission for the **Physical Aggregate**, **Physical Sellable,** and **Non–Sellable Qty** of inventory.
Show All Inventory Movement by Default	Select this option to enable view permission for **inventory movement** records.

Overview

Sellercloud calculates inventory and records quantities in several places using different terms. This topic introduces the common inventory terms that appear in two locations.

Inventory Terms on the Product Home Page

1. Access **Inventory** > **Manage Inventory**.

2. Select the product for the **inventory terms** you want to review.

3. Refer to the **Inventory** panel that is on the product's home page.

TERM	DESCRIPTION
Aggregate Qty	The quantity that is available for sale **(Physical Inventory in Product Warehouse – Reserved Qty = Aggregate Qty).** **Note**: While this is the available qty, safety qtys will limit the available qty per channel.
Physical Inventory	Sum total of **Aggregate Qty + Reserved Qty**. This is the total qty that you have available in your sellable warehouses.
Physical Inventory (including non-sellable)	Sum of total **Physical Inventory** + unsellable inventory (ex: inventory in an interim warehouse) Total Inventory across **all** warehouses. This appears when the Client Setting **Show Physical Qty including non-sellable in product home page** is enabled.
Reserved	The quantity that has been reserved from the Physical inventory for open orders. Reserved inventory is categorized as Unpaid orders and Paid but not yet shipped.

Terms on the Manage Inventory page

Note: These columns appear when the relevant Client Settings are enabled.

TERM	DESCRIPTION

Agg Available Qty	The quantity that is available for sale. **(Physical Inventory – Reserved Qty = Aggregate Qty)**.
Ph. Agg. Qty	Total Inventory across **all** warehouses. **(Ph. Sellable Agg. Qty + Non sellable Qy = Ph. Agg. Qty. Alternatively, Agg Available Qty + Reserved Qty + Non sellable = Ph. Agg. Qty)**.
Non sellable Qty	Qty across all unsellable warehouses.
Reserved Qty	The quantity that has been reserved from the Physical inventory for open orders.
Ph. Sellable Agg. Qty	The sum total of **Aggregate Qty + Reserved Qty**. For technical reasons, the above calculation is used rather than pulling the qty from the product warehouse. A column shown above the grid, relates to Inventory Valuation.
Total Inventory	The Client Setting **Show Total Inventory in Manage Inventory Grid using:** controls the mapping of that value to either the **Ph. Agg. Qty**, **Ph. Sellable Agg. Qty**, or **Agg Avail Qty** with a default setting of **Agg Avail Qty**.
