

ITF-14 Barcodes

04/30/2025 3:21 pm CDT

Overview

ITF-14 barcodes are designed for labeling boxes that have multiple quantities of the same product. These barcodes will include the product's **UPC** and the number of items in a box. This feature allows you to scan a case quantity instead of scanning each unit or entering a quantity.

The allowed characters for an ITF-14 barcode are numbers, dashes, and parentheses. The first character must always be a number. So, for example, (01)123456 will not be accepted, but 01-123456 will be considered valid.

An **ITF-14 barcode** encodes **GTIN-14** (Global Trade Item Number) information and comprises four components: A one-digit Indicator prefix, a GS1 Company Prefix, an Item Reference, and a Check Digit. For more details, see the [GTIN website](#).

There are several ways to manage your products' **ITF-14 barcodes** in Sellercloud. This article outlines how you can **Add**, **Upload**, **Print**, or **Delete** them.

Here's how to [Create and Print ITF-14 barcodes](#) in Skustack.

Manage Product ITF-14 Barcode

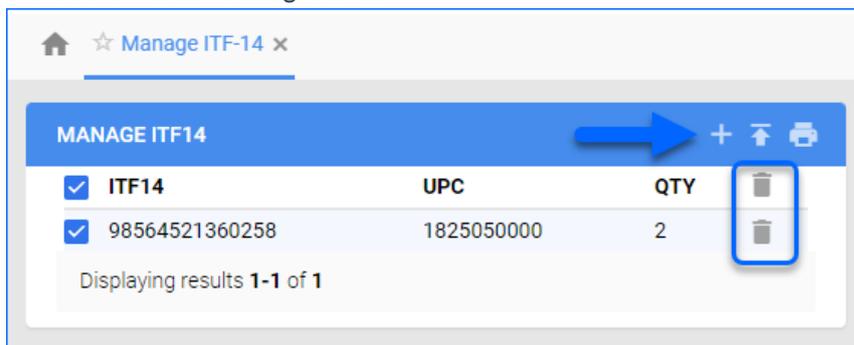

You can configure multiple **ITF-14 barcodes** per product.

Only one ITF-14 barcode can be selected per product for printing at a time. The value under each barcode should be the **SKU** and the **Product Name**.

[Shadow Products](#) use their parent product's distinctive **ITF-14 barcode**.

To manage your **ITF-14 Barcodes**:

1. Navigate to **Inventory** > **Manage Inventory** > Open a **Product**.
2. From the **Toolbox** > **Manage ITF-14**.

There are a few actions available in the panel header. **Add**, **Upload** and **Print ITF14 barcodes**. From here, you can also delete any existing **ITF-14 barcodes**.

Add ITF-14

To add an **ITF-14 barcode**, click on the plus button. Enter the product's **UPC**, **ITF14**, and **quantity**.

ADD ITF14 TO PRODUCT ✕

Print ITF-14 Barcode

To print the **ITF-14 barcode**, select it from the grid and click on **Print ITF14 Barcode**. A PDF file with your product's barcode will be downloaded to your device.

MANAGE ITF14				+
<input checked="" type="checkbox"/>	ITF14	UPC	QTY	
<input checked="" type="checkbox"/>	98564521360258	1825050000	2	

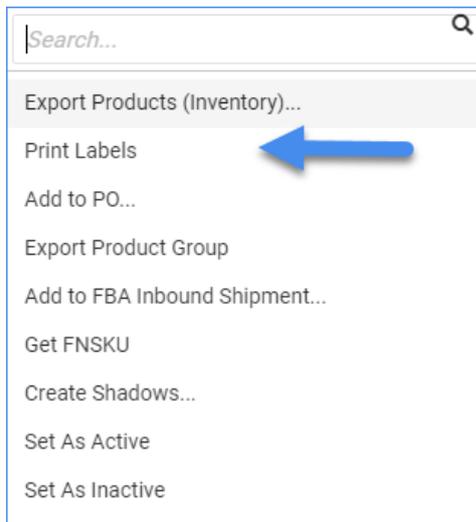

Displaying results **1-1** of **1**

You can also **Export** your products' Barcodes from the [Manage Catalog](#) page. Search for and select the products, then go to the action menu and click **Export ITF-14 Barcodes** or **Export ITF-14 Barcodes (Excel)**.

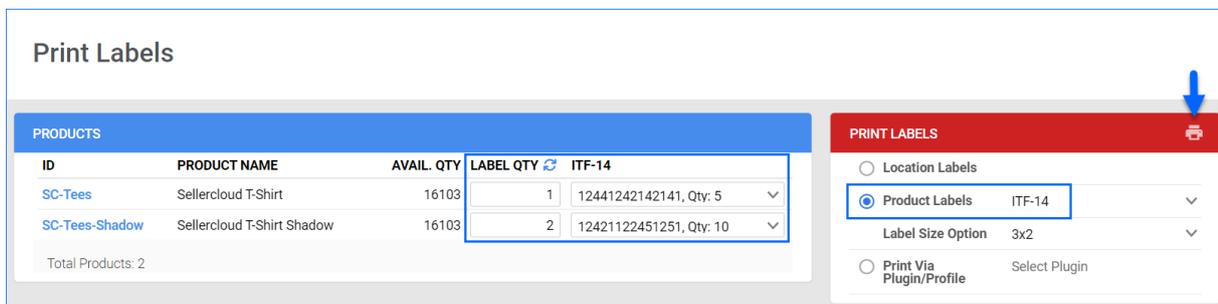

Print ITF-14 Barcodes in Bulk

You can also print **ITF-14 Barcodes** for multiple SKUs from the [Manage Inventory](#) and [Manage Catalog](#) pages. To do that:

1. Access **Inventory** > **Manage Inventory**. Alternatively, you can go to **Catalog** > **Manage Catalog**.
2. Select the products for which you want to print the labels from the results grid.
3. In the bottom-right corner, click the **Actions** icon and select **Print Labels**.

4. You will be redirected to the **Print Labels** page. In the **Products** panel, you will see a list of your selected SKUs, their names, and their current available Inventory. You can:
 - a. Manually input the number of labels in the **Label Qty** field, or
 - b. Click the rotating arrows button. This action will auto-populate the number of labels to be printed, matching the current available quantity.
5. In the **Print Labels** panel select **Product labels** and **ITF-14** from the dropdown.
6. In the **Products** panel you will see a new column for **ITF-14**. Select the specific code to print from the dropdown. You can only print one ITF-14 barcode per SKU at a time.
7. Click the **Print** icon. Your labels will be generated in a PDF file and downloaded to your device.

Manage Product ITF-14 Barcodes

You can configure multiple **ITF-14 barcodes** per product.

The allowed characters for an ITF-14 barcode are numbers, dashes, and parentheses. The first character must always be a number. So, for example, (01)123456 will not be accepted, but 01-123456 will be considered valid.

Only one ITF-14 barcode can be selected per product for printing at a time. The value under each barcode should be the **SKU** and the **Product Name**.

Shadow Products use their parent product's distinctive **ITF-14 barcode**.

To manage your **ITF-14 Barcodes**, navigate to:

1. **Inventory** > Open a **Product**.

2. Toolbox > Manage ITF-14.

From here, you can execute a few actions and remove any current **ITF-14 barcodes**.

Home > Search > Manage Inventory > 123 > Manage ITF14

Product Name: Demo Product

Select File: No file chosen [Download template](#)

Add ITF-14

Once you click on the plus button, you will be able to add an **ITF-14 barcode**. You will be asked to enter the product's **UPC, ITF14, and quantity**.

Upload ITF-14

Individually

To upload **ITF-14 barcodes** individually, you can either upload your file or download the template provided by Sellercloud, populate the needed fields, and then upload it back. You will need to enter **ProductID, UPC, ITF14, and quantity**.

In Bulk

You can upload **ITF-14 barcodes** in bulk. Navigate to:

1. **Inventory > Import Product Info > Import Product ITF14.**
2. Download the template and enter the following:
 - a. **ProductID**
 - b. **UPC**
 - c. **ITF14**
 - d. **Qty**
 - e. **Action: _ADD_**

3. Click **Upload ITF14.**

Home > Search > Manage Inventory > Import Product Info > Import Product ITF14

Select File: No file chosen

The file upload option also allows you to delete existing ITF-14 barcodes in bulk. In the template column **_ACTION_**, write **_DELETE_**. When the file is processed, the selected barcodes will be removed from the system.

Find Products by ITF-14 barcode

You can use **Advanced Search** to find products by the **ITF-14 barcode**.

1. Navigate to **Inventory > Advanced Search**.
2. Enter the **ITF-14 barcode** into the **Product ITF-14** field.
3. Click **Search**.

The screenshot shows the 'Advanced Search' interface in the 'Manage Inventory' section. The breadcrumb trail is 'Home > Search > Manage Inventory'. At the top, there are links for 'Filters Applied', 'Remove All', and 'Saved Searches: [Select]'. Below this, there are options for 'filtercleared: true', 'Remove', and 'Inventory Mode: Default'. The main search area includes a 'Company' field, 'Active' status, 'Rows Per Page' (50), and 'Max Records' (1000). The 'Product ITF14' field is highlighted with a blue box. At the bottom, there are two buttons: 'Search' and 'Advanced Search'. A blue arrow points to the 'Search' button, and another blue arrow points to the 'Advanced Search' button.

You can also **Export** your products' Barcodes from the **Manage Inventory** page. Search for and select the products, then go to the action menu and click **Export ITF-14 Barcodes** or **Export ITF-14 Barcodes (Excel)**.
