Overview

In this article, you will learn about Sellercloud's **Qty By Component Summary** report. Unlike other reports, which are typically focused on the sales of the **kit parents**, this report gives insight into the trends of individual items and summarizes the total quantity sold for each product, whether as a regular product or **kit component**. The report also includes sales of the component in independent kits.

It includes information about stock, sales, and product details:

- **Kit Component Stock Summary:** Available Quantity, Reserved Quantity, Quantity Sold, On Order, FBA Available Quantity, and FBA Physical Quantity.
- **Product Details:** SKU, Product Name, Manufacturer, and Purchaser.

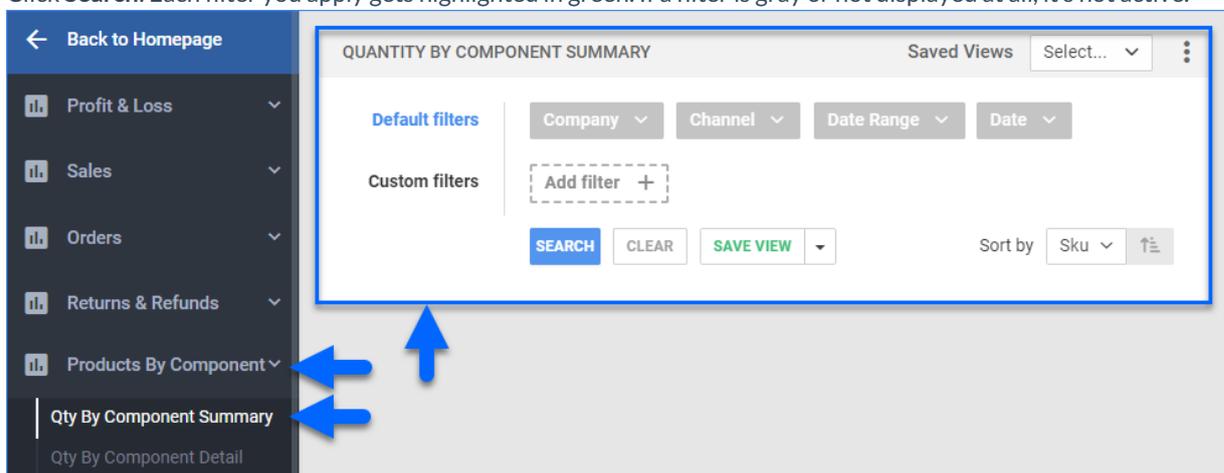

You can run this report automatically on a regular basis with [Scheduled Tasks](#).
